

AppleDesign Powered Speakers II

Features

Audio quality

- Extend low-frequency response with tuned-port, bass-reflex system
- Optimize frequency response at all volume levels using active equalization
- Provide controlled sound dispersion for excellent stereo separation at close proximity
- Eliminate external input noise using balanced input circuitry

Computer compatibility and use

- Dual-input feature mixes sound from your Macintosh or Windows-based computer with the audio tracks on a CD
- Built-in magnetic shielding for use near computer displays and peripheral devices without interference
- Work with personal and portable stereo systems, as well as televisions that support sound output

Ease of use

- Easy setup and installation
- Attractive, compact design fits any desk
- Adjustable speaker leg lets you set tilt angle for best performance
- Built-in dual-channel amplifier
- Volume control conveniently located on front panel
- Headphone jack on front panel for private listening

Now you can afford to add audio-ophile-quality speakers to your Macintosh or Windows-based computer system.

That's because the compact AppleDesign Powered Speakers II are designed to work perfectly with virtually any personal computer, portable CD player, or audiocassette player, and with any television that supports sound output.

These Apple speakers are specially engineered for use with computers and are magnetically shielded to prevent interference, so you can use them near your monitor and peripheral devices. They can mix the input from your computer with the audio tracks on a CD, and provide excellent stereo separation and frequency response.

The volume control and the headphone jack are conveniently located on the front panel of the powered speaker, and you can adjust the tilt angle of both speakers to achieve the best possible effect.

Sold separately in a slate color to match many personal stereo, video, and computer systems, the AppleDesign Powered Speakers II are also available—when sold in bundles such as the Apple Multi-media Kit for Macintosh—in a platinum color to match Macintosh computers.

The most outstanding feature of these high-quality, multipurpose speakers just may be their low price. And this affordability may lead you to conclude that you really need a pair in your office.

And another pair in your kitchen.

AppleDesign Powered Speakers II

Ordering Information

AppleDesign Powered Speakers II

Order No. M3261LL/A

- Main (powered) speaker with amplifier and satellite speaker in slate color
- Power-supply module (120-volt input)
