

Figure 7-13b
14 MHz video timing signals

Low-resolution display

In the graphics modes, VA and VB are not used by the character generator, so the IOU uses lines SEGA and SEGB to transmit H0 and HIRES', as shown in Table 7-14.

Table 7-14
Character-generator control signals

Display mode	SEGA	SEGB	SEGC
Text	VA	VB	VC
Graphics	H0	HIRES'	VC
