

A.B.A.C.U.S.-Macdougall Lower-Case Adapter  
Printed Circuit Board by James P. Davis from  
an article in The ABACUS II, April 1980, volume  
number 2, issue number 4.

A 2716 DIP IC (socket) attaches to the top of  
the PCB in the center.

A 24 DIP header attaches to the bottom of  
the PCB at the right-hand edge (as shown  
above). This plugs in to the Apple character  
generator socket at A5 on the mother board.
