Guide to the Clip Art Disk

The Personal Newsletter Clip Art disk contains over 200 pictures in all types of catagories. You can use Clip Art by following the instructions in the Personal Newsletter manual.

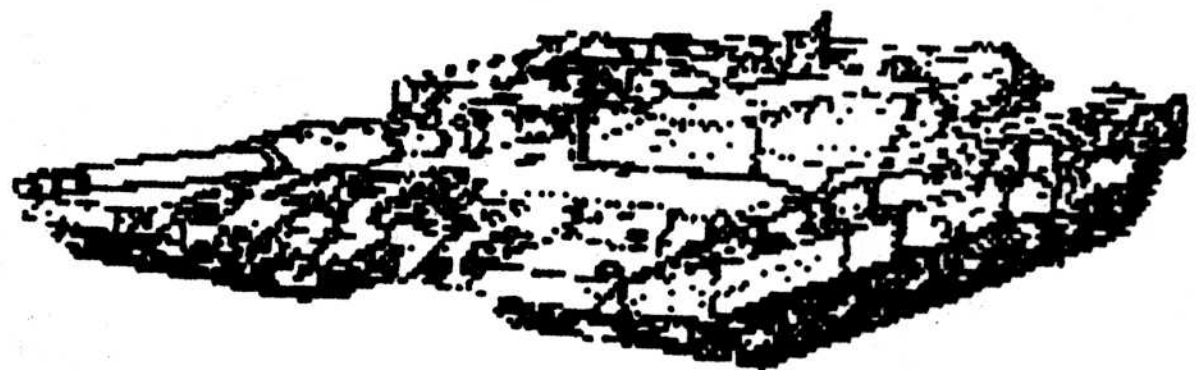

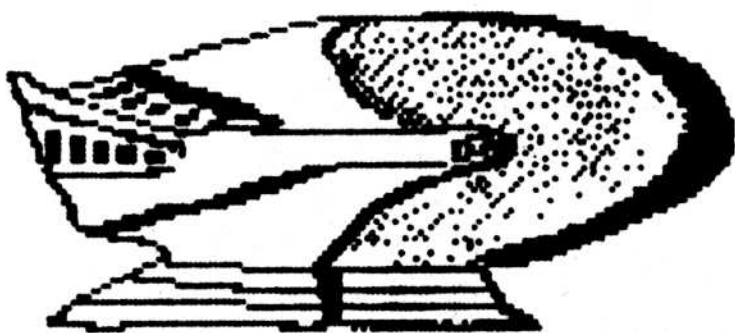

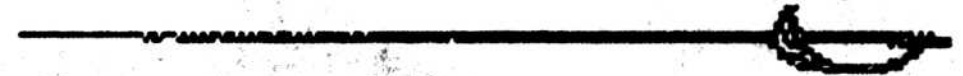

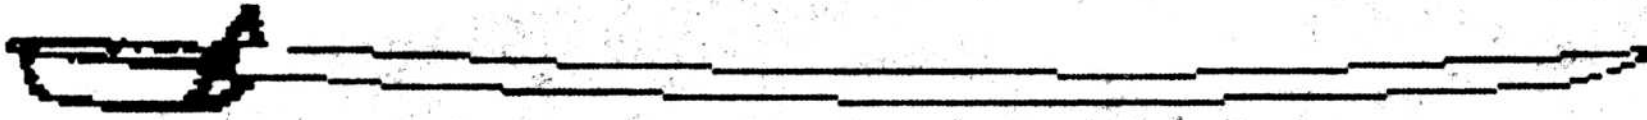

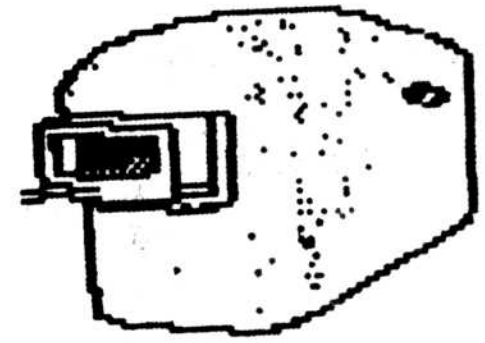

The **Apple** disk also contains three new fonts. These fonts are on side B of the disk and can be recognized by the FNT extension to the file name. To load in the fonts, follow the instructions in the Personal Newsletter manual.

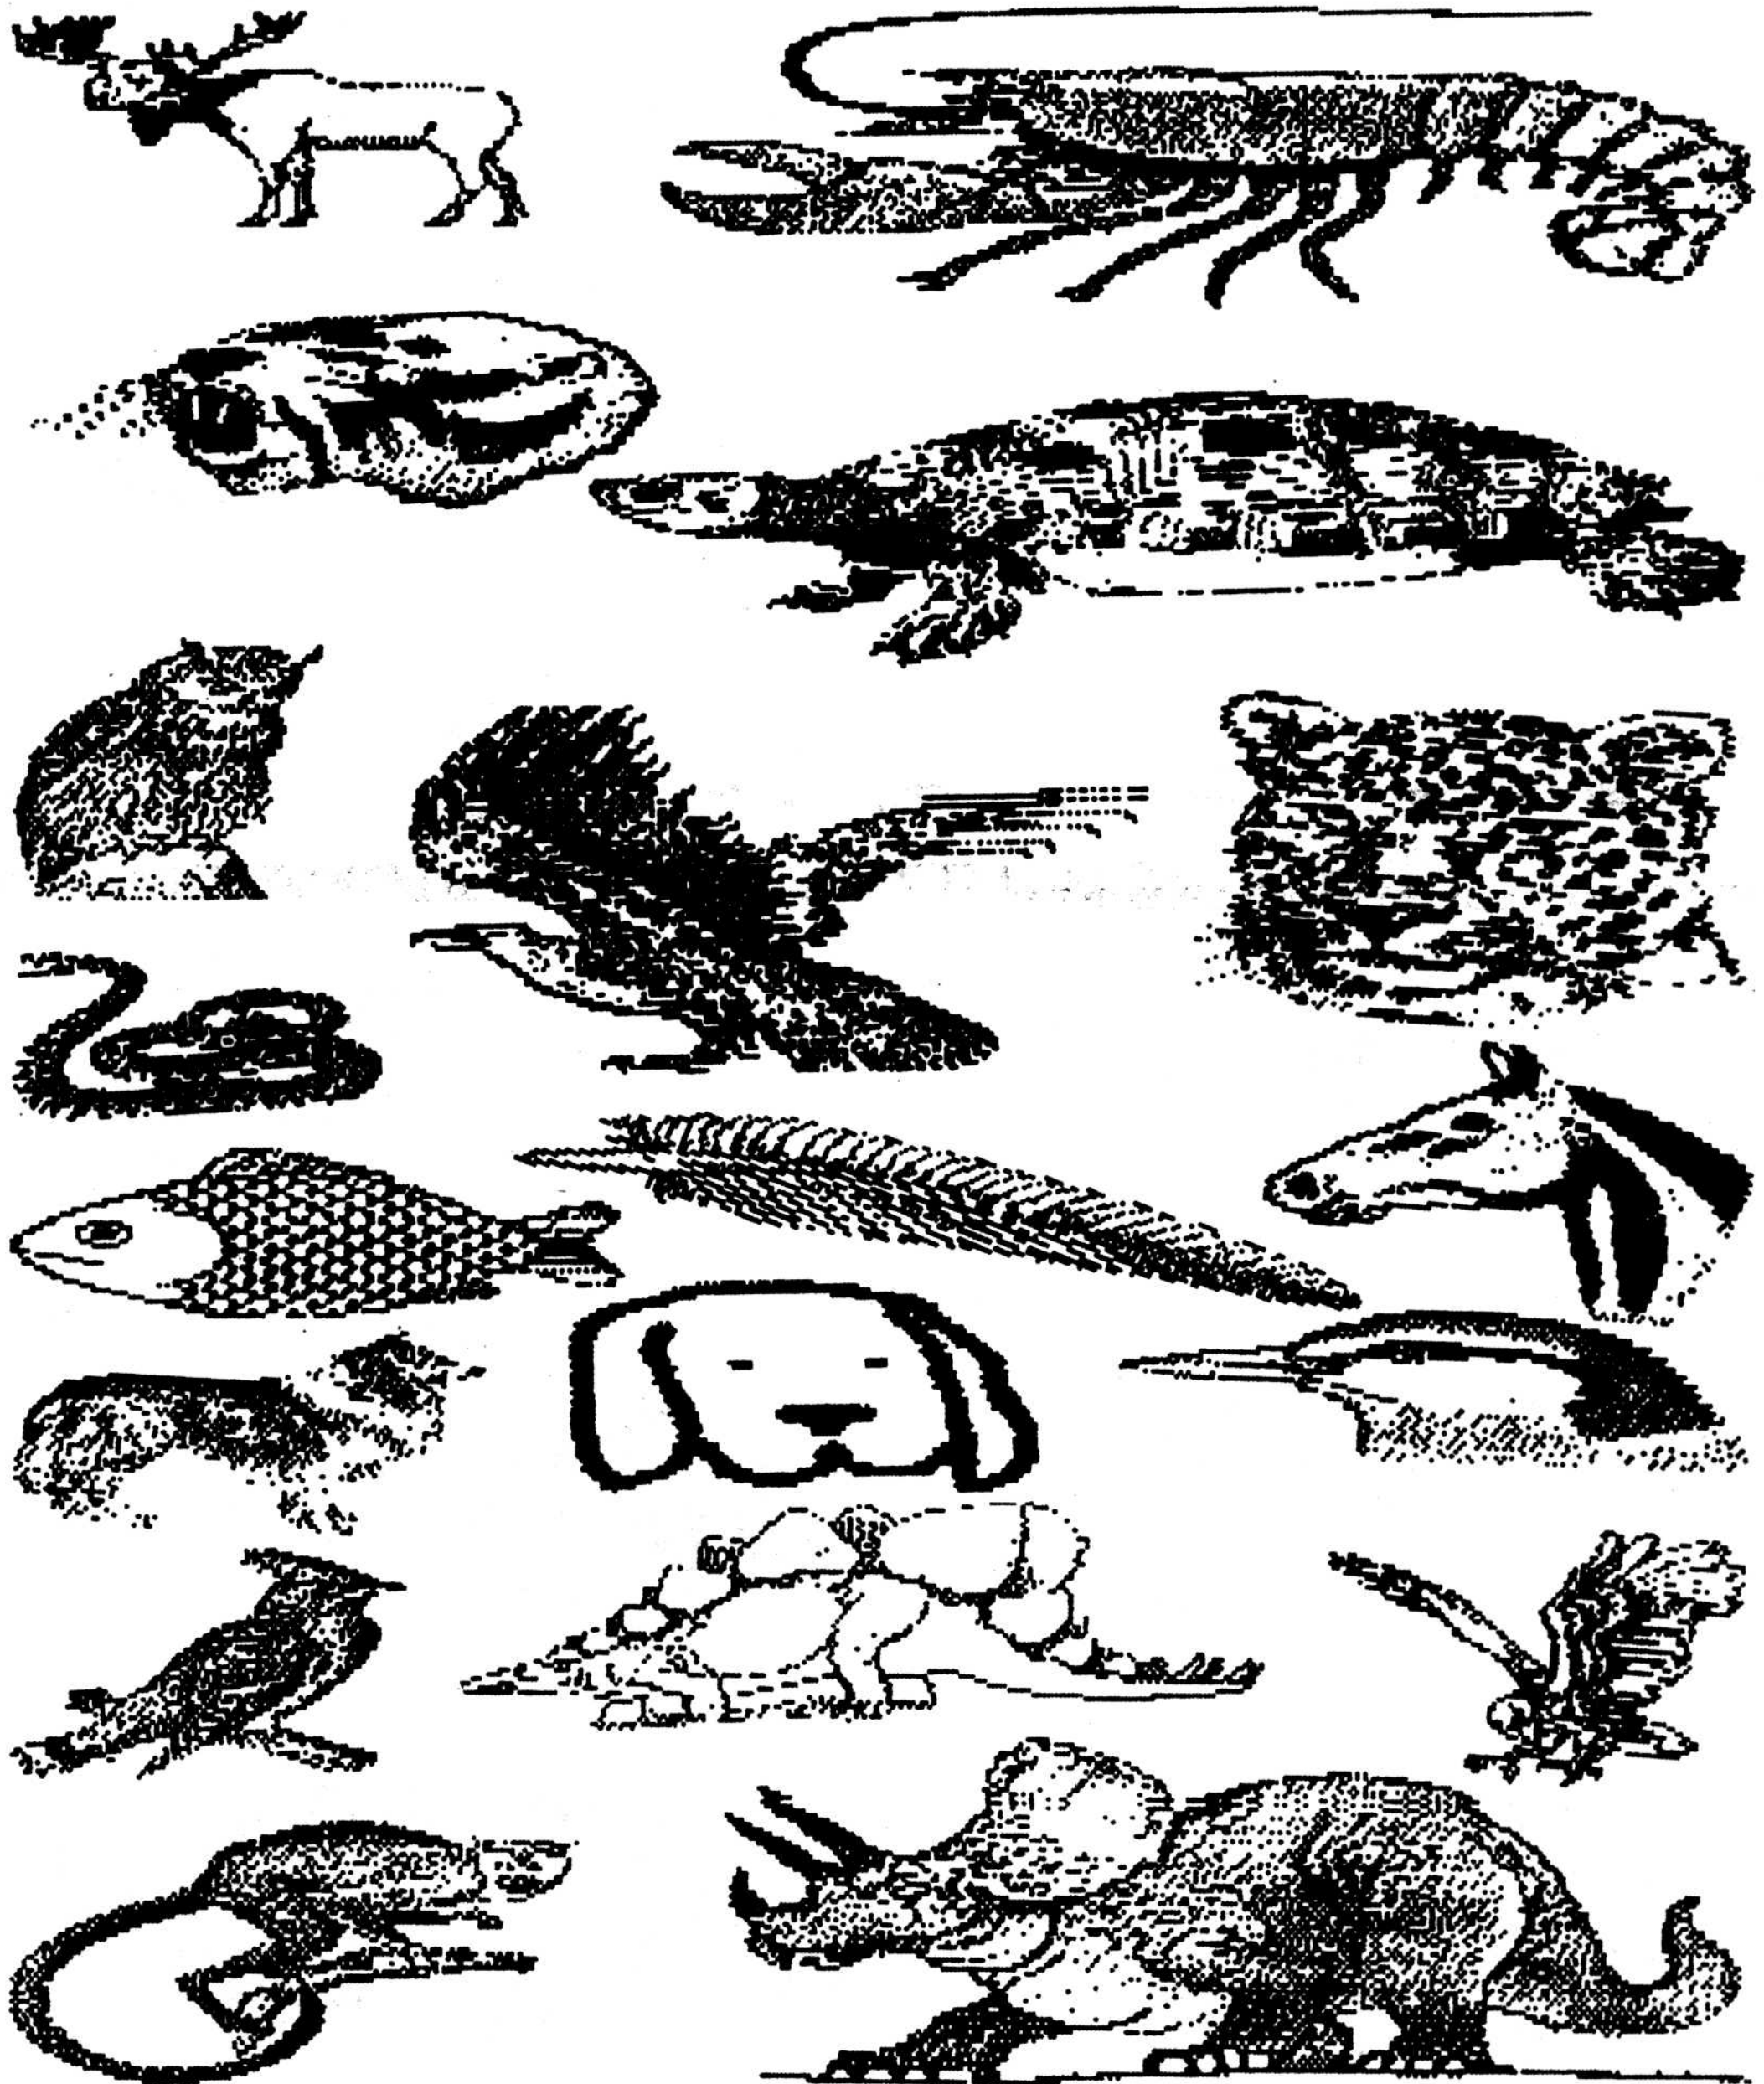

The art is arranged differently in the Apple and Commodore versions. The Apple pictures are stored in pages with folder names. The Commodore pictures are stored in three photo albums called "Personal2," "Business2" and "Misc2."

Each page has a code at the bottom so you can find it easily. Here's a sample code:

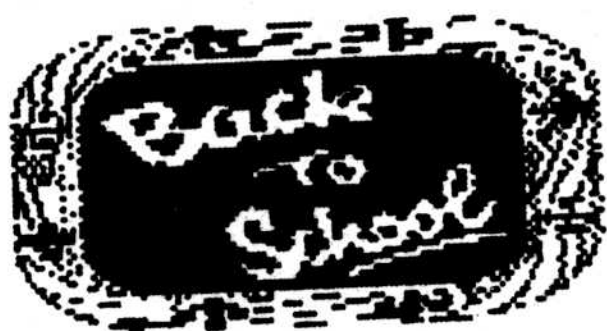

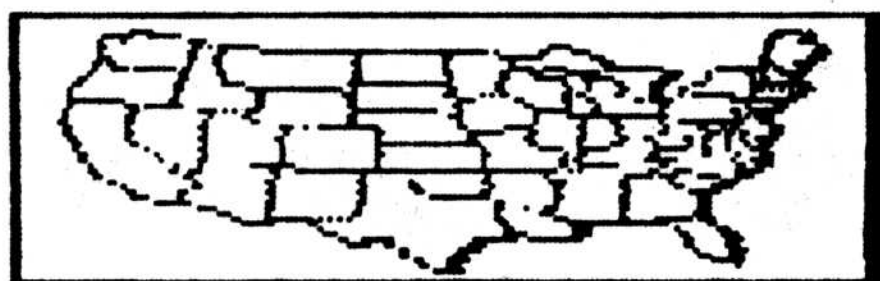

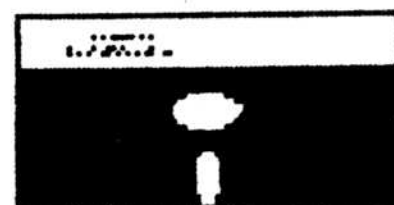

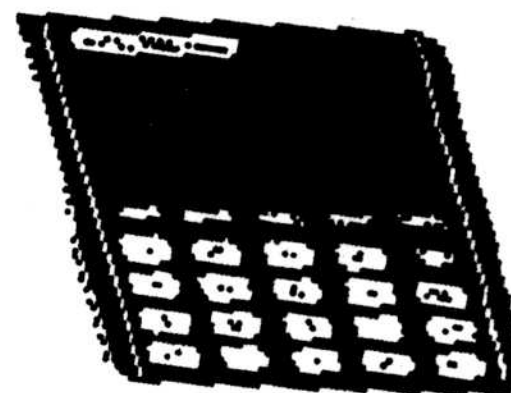

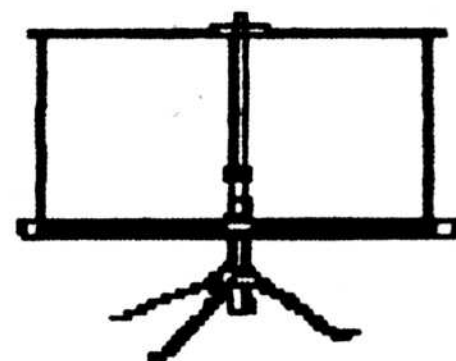

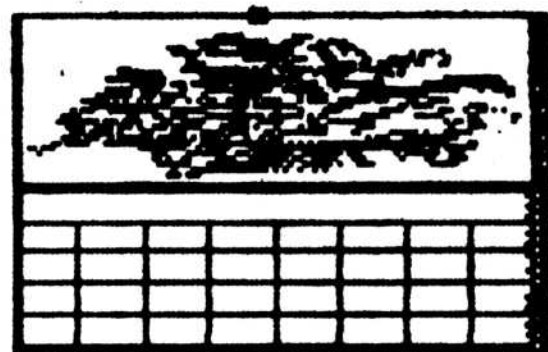

Apple: SPORTS
C64: MISC2

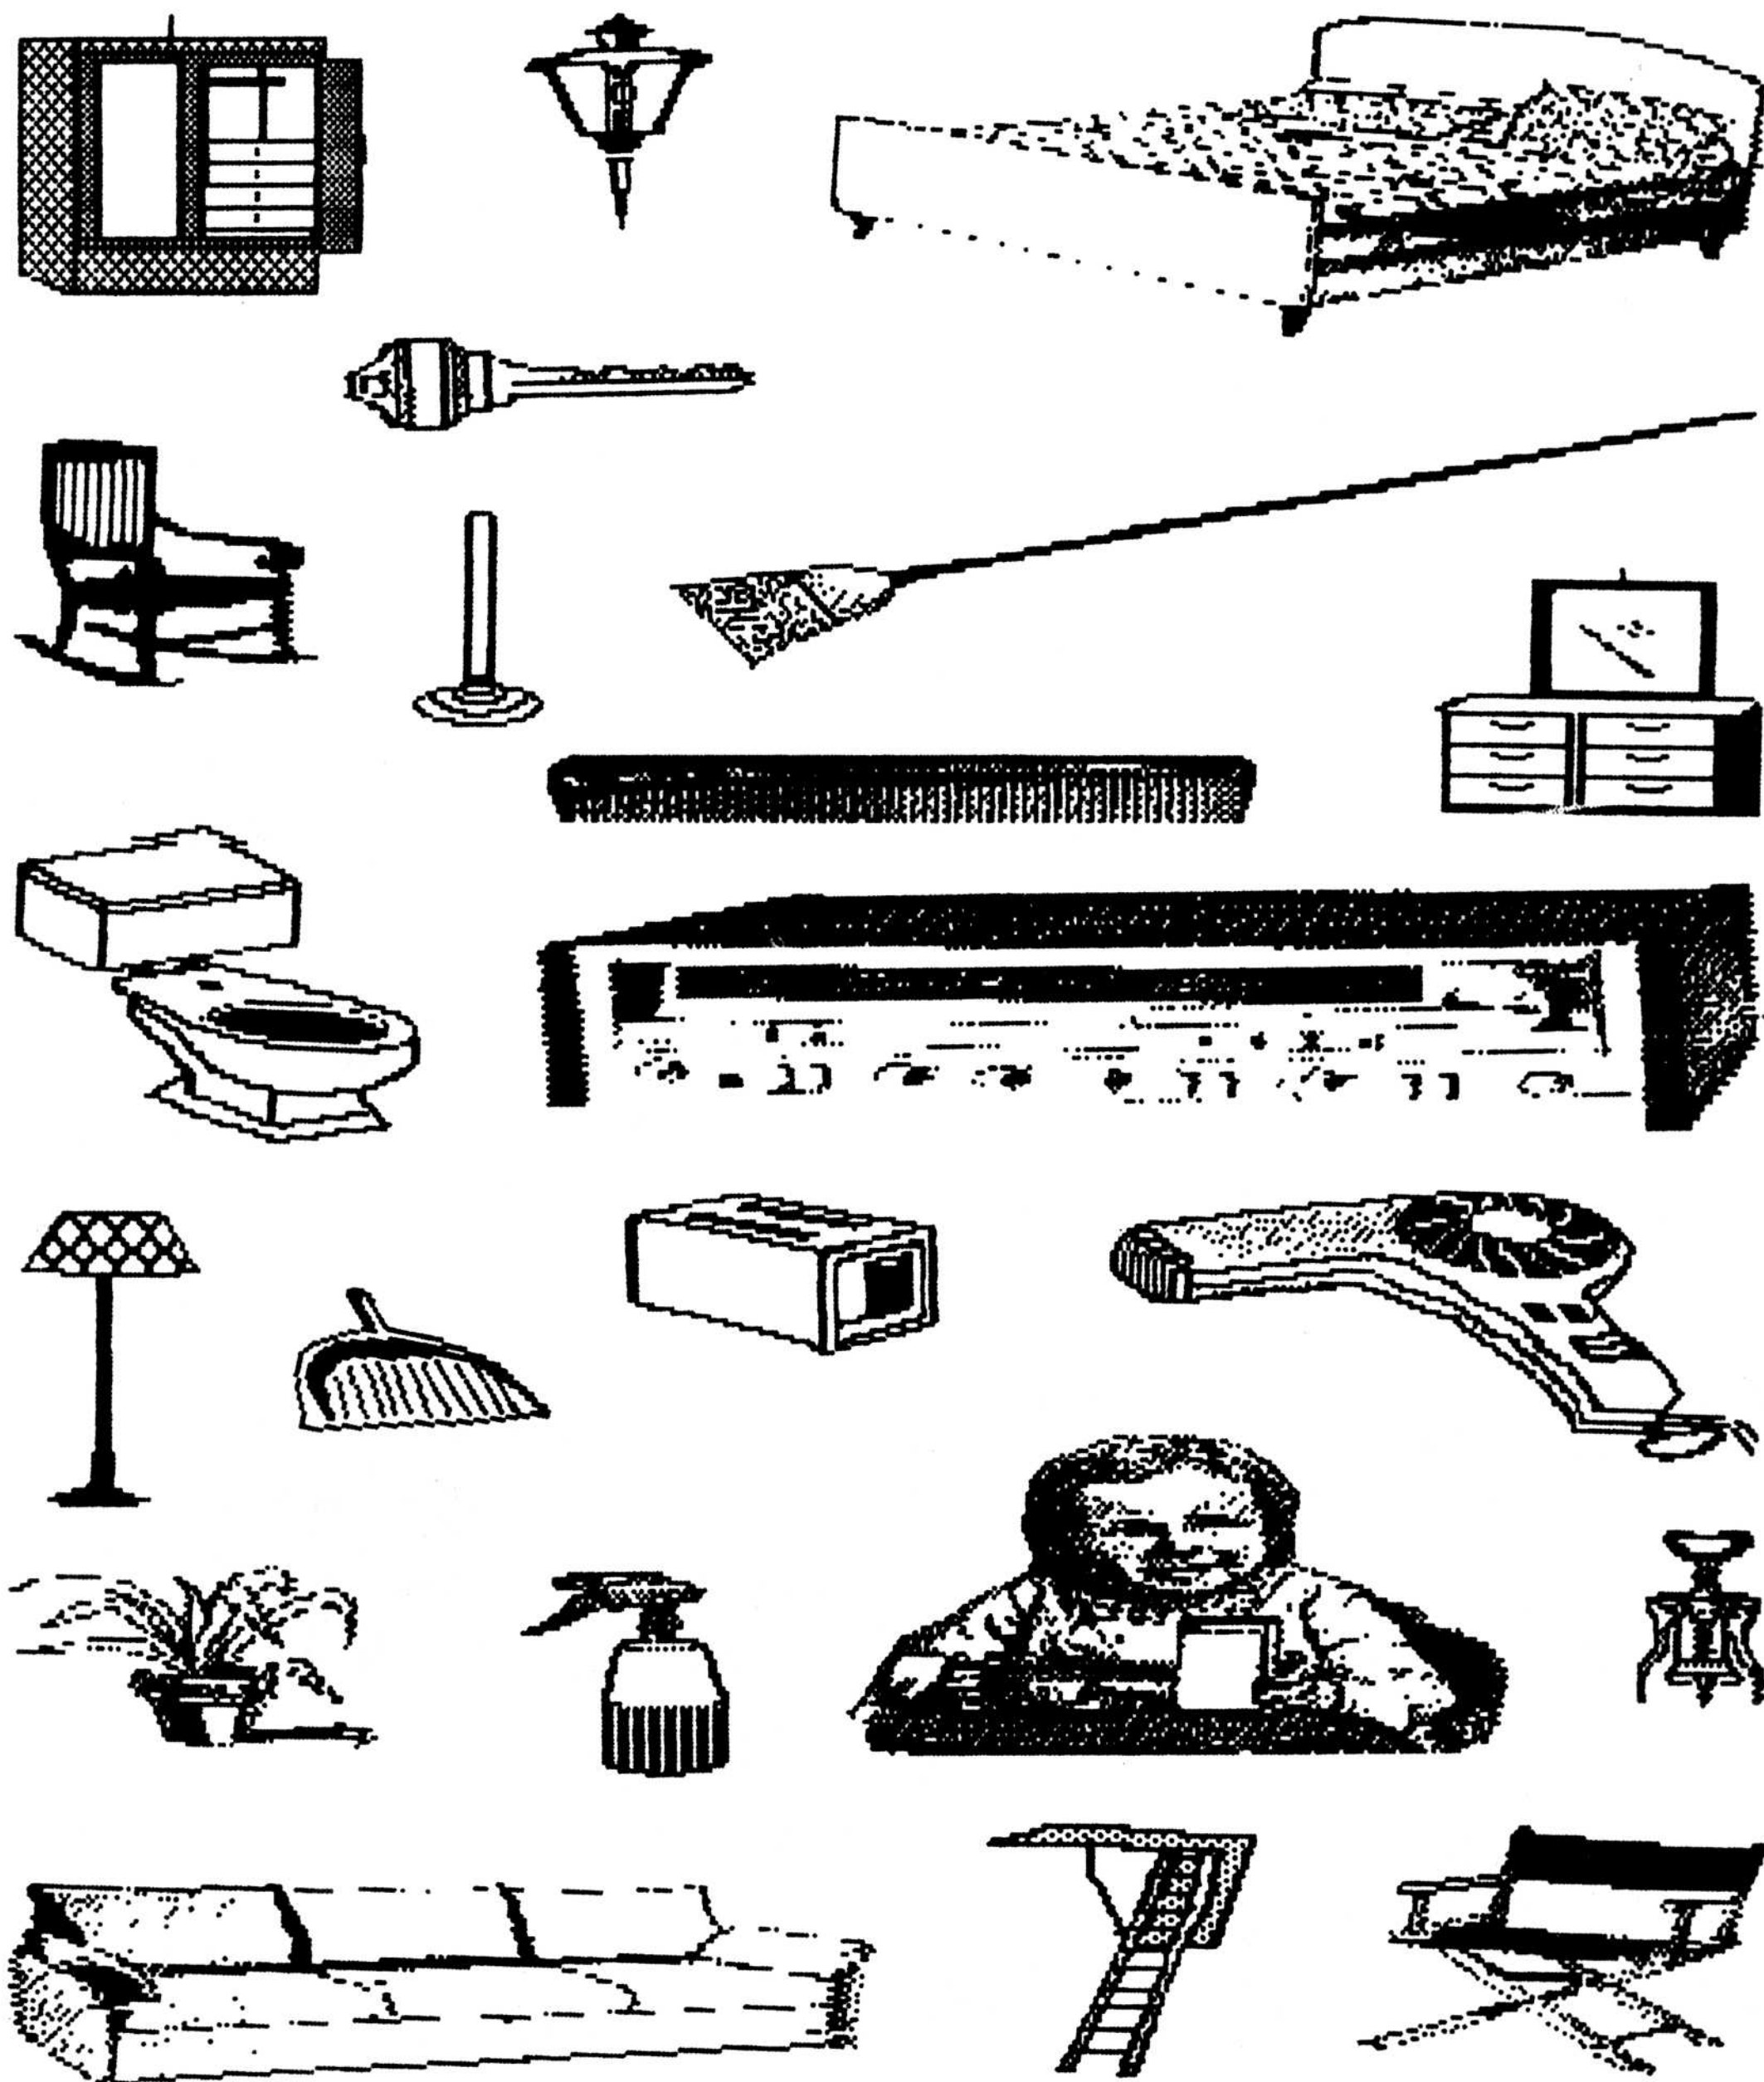

This means you can find the pictures in a folder called "SPORTS" on the Apple disk, and in the Photo Album called "MISC" on the Commodore disk.

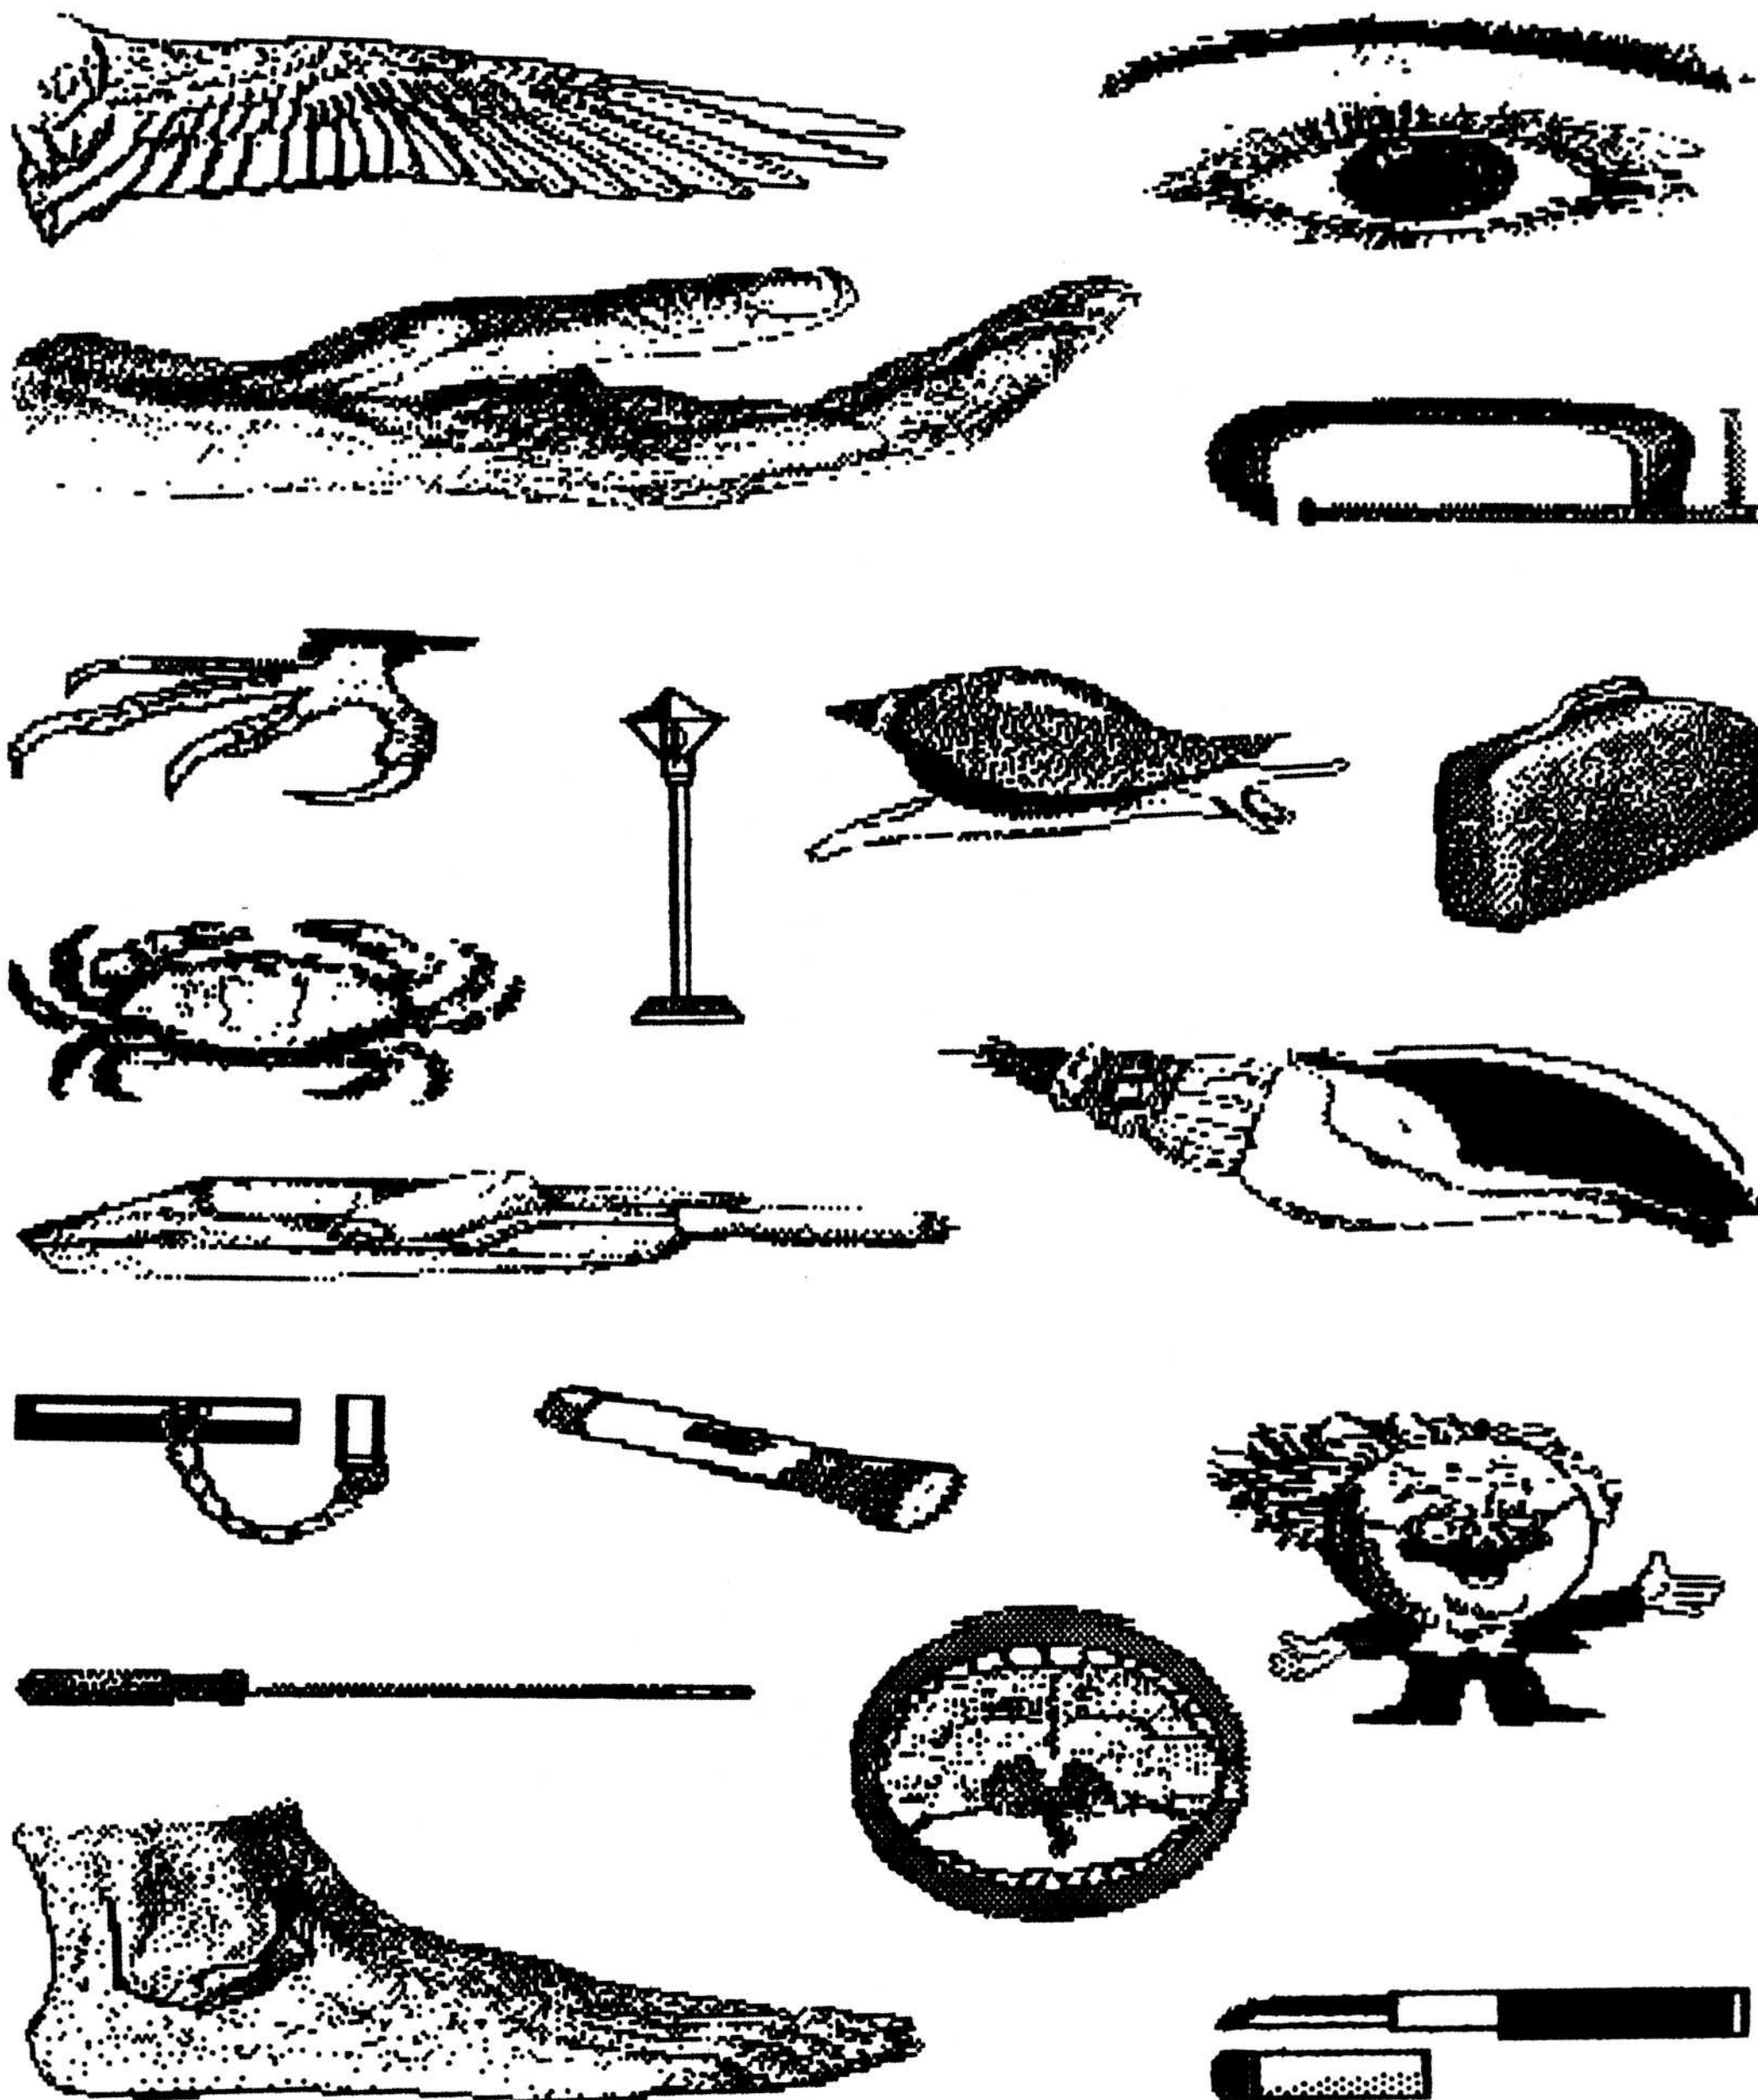

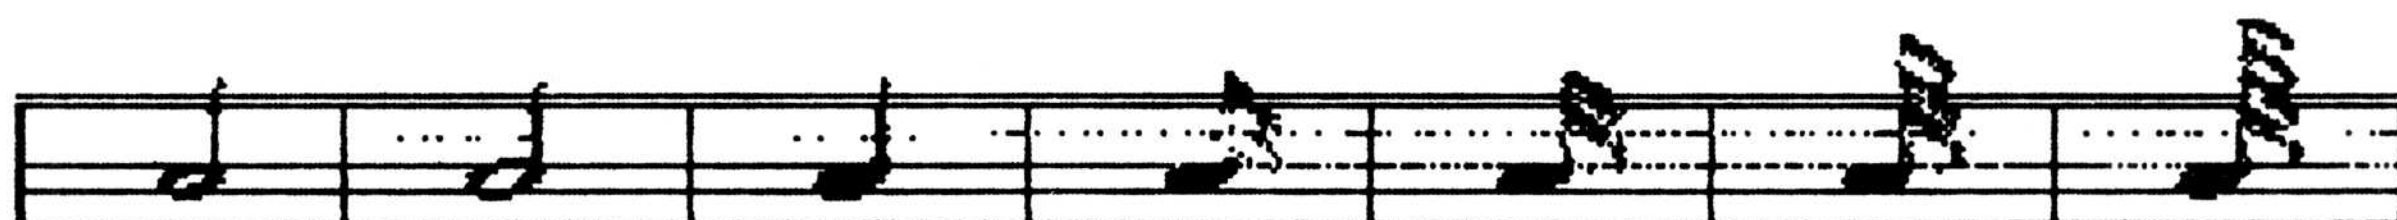

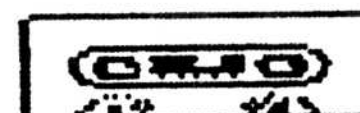

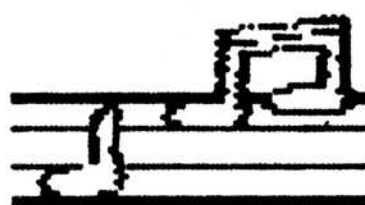

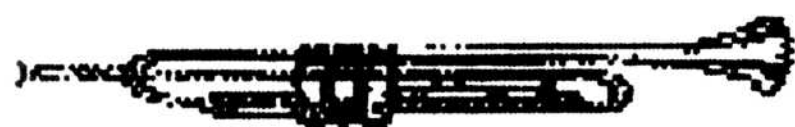

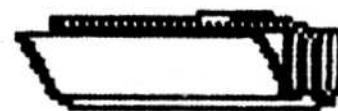

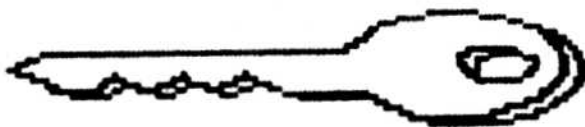

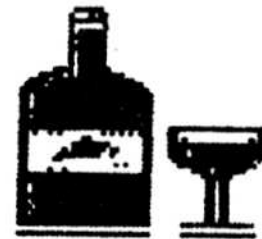

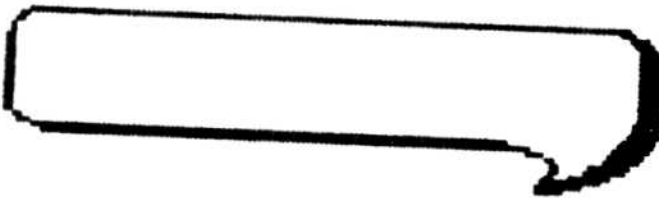

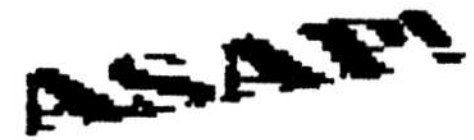

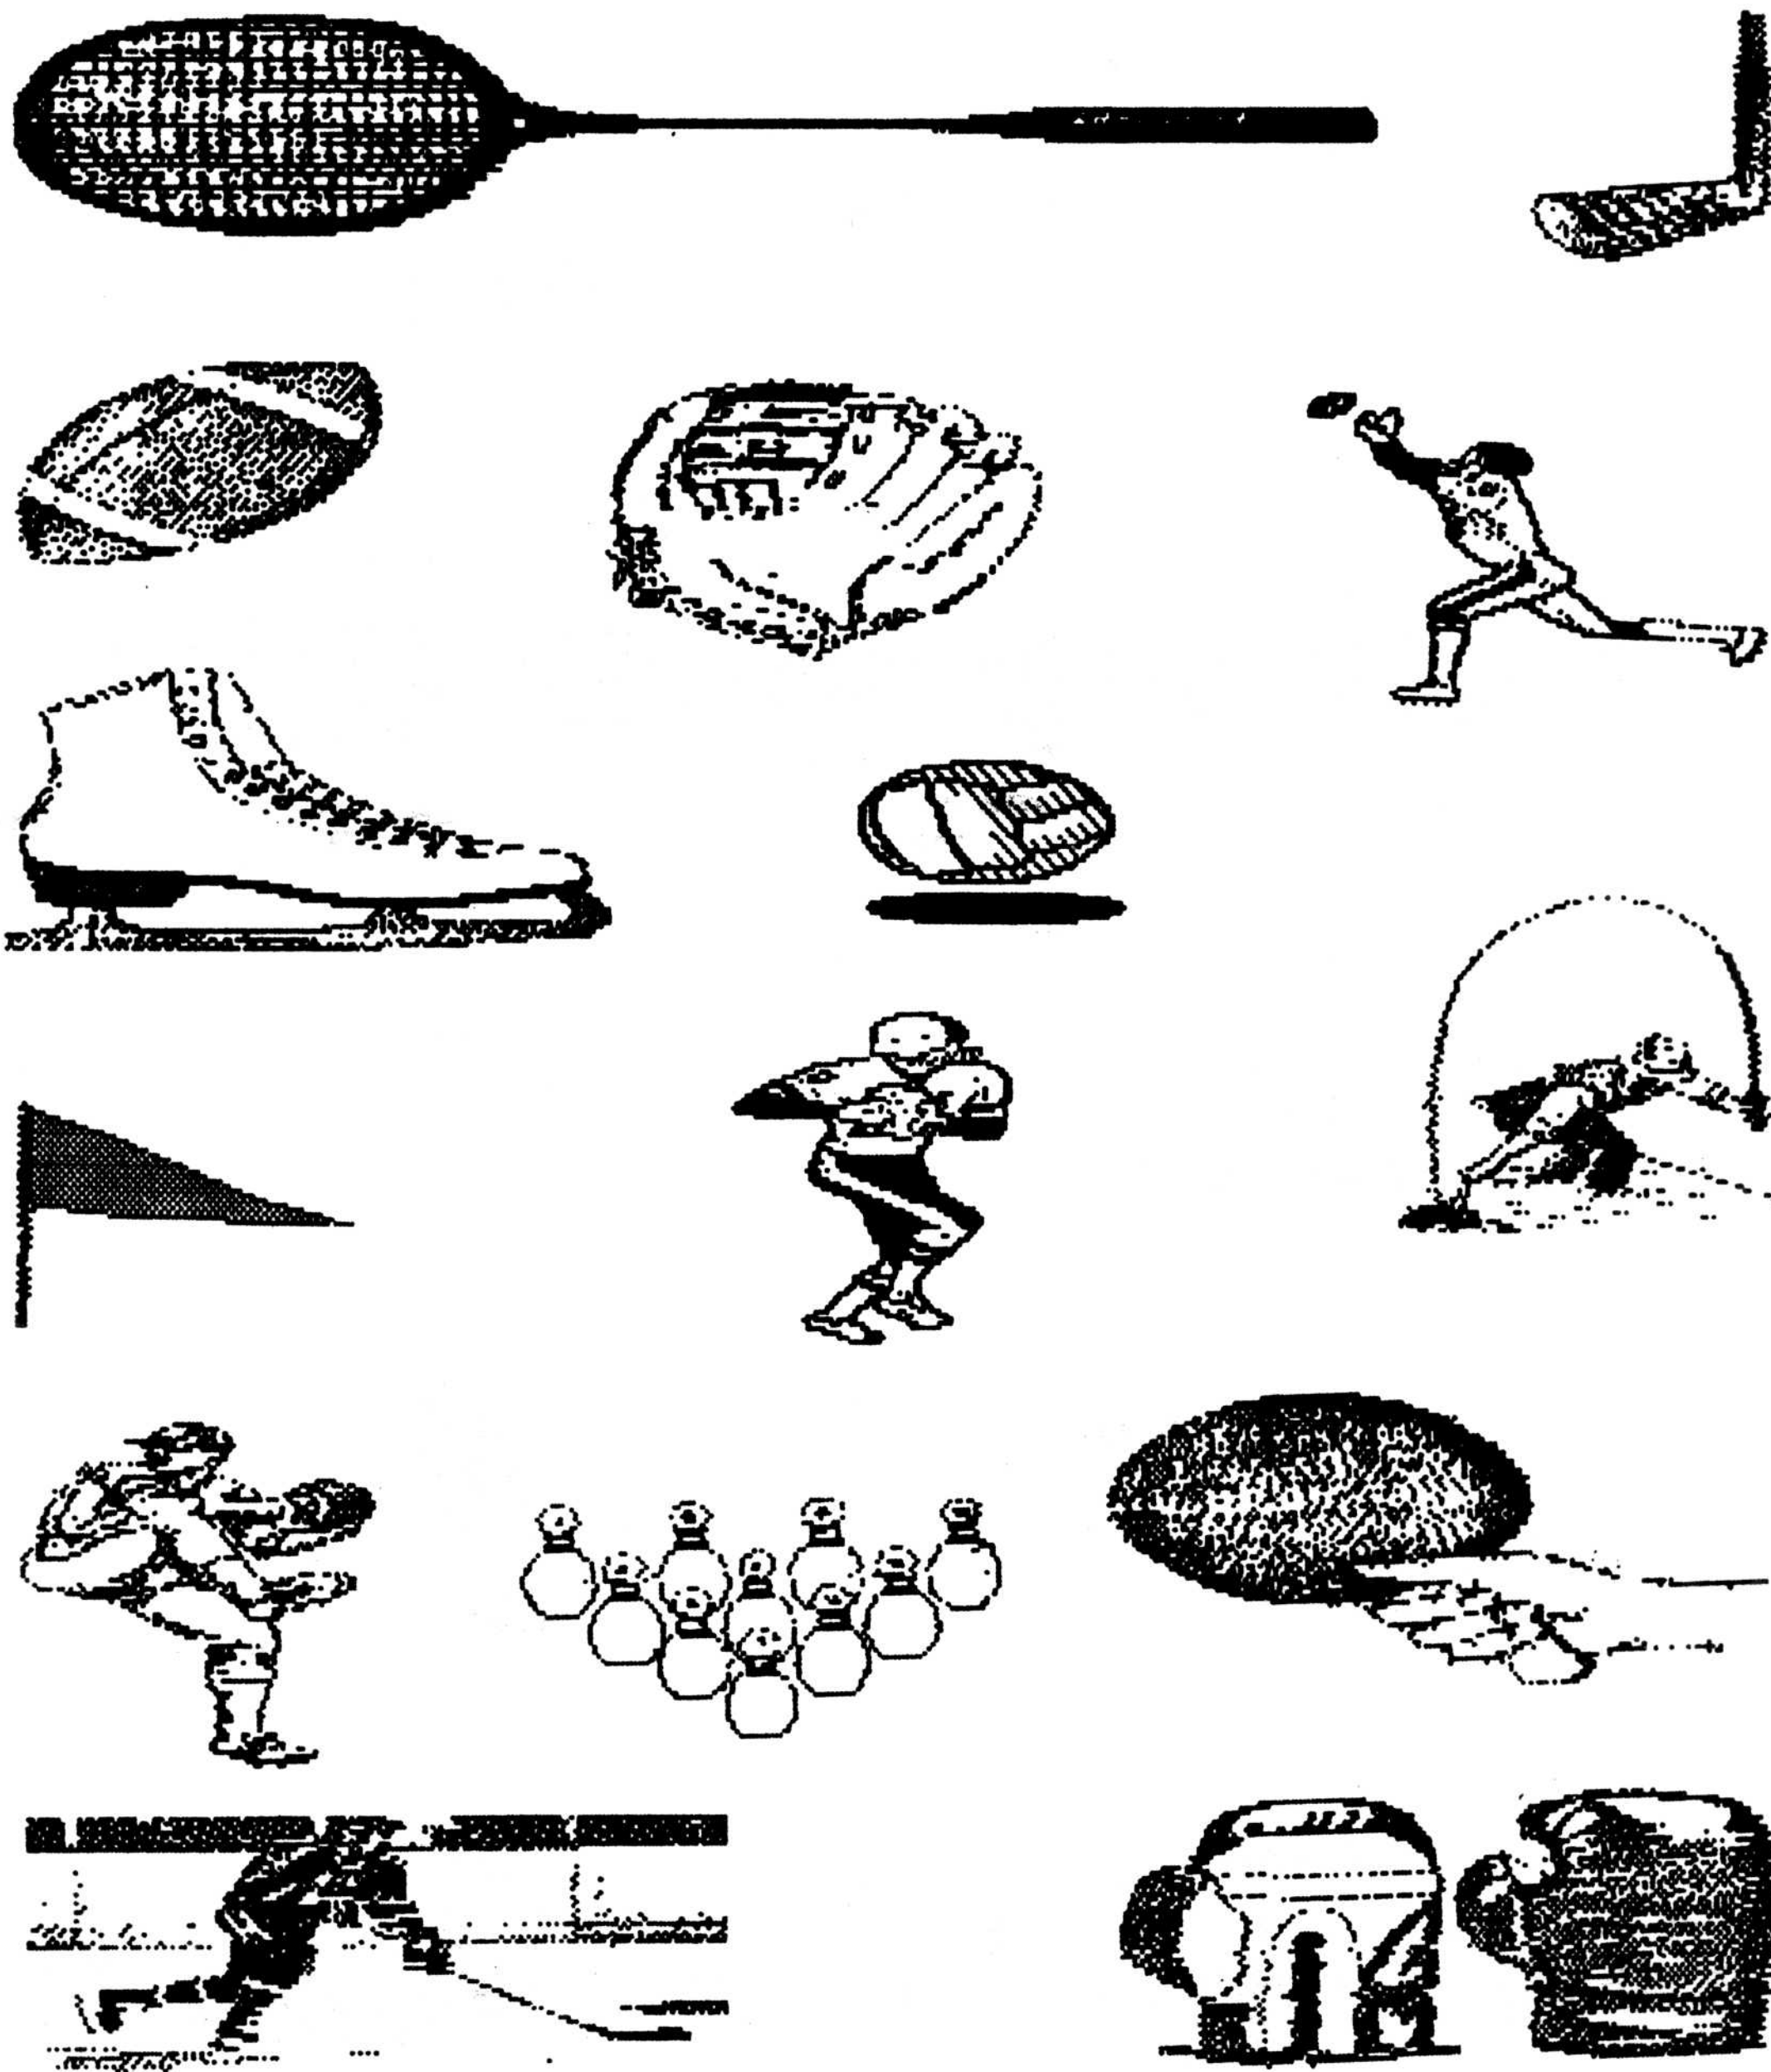

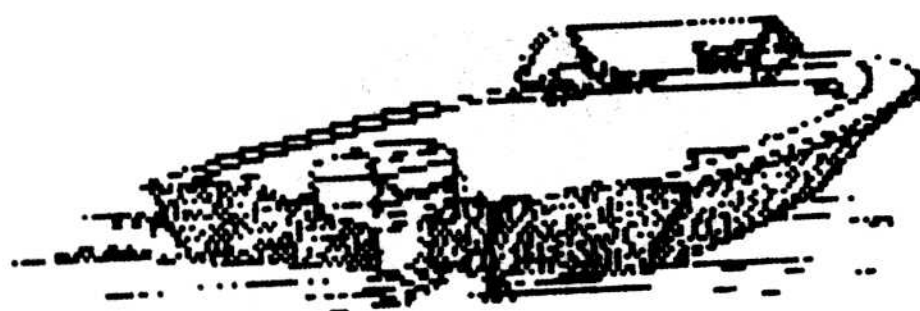

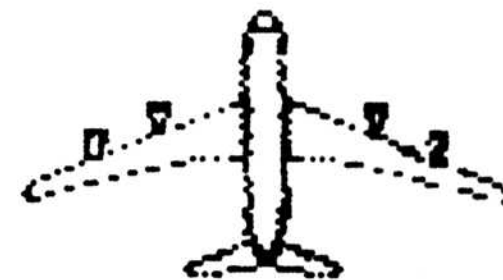

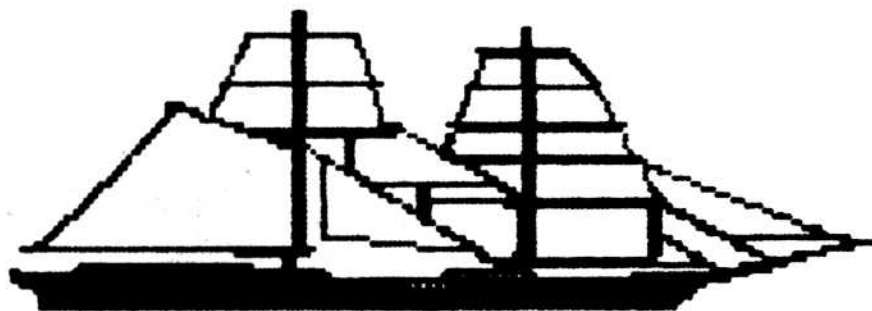

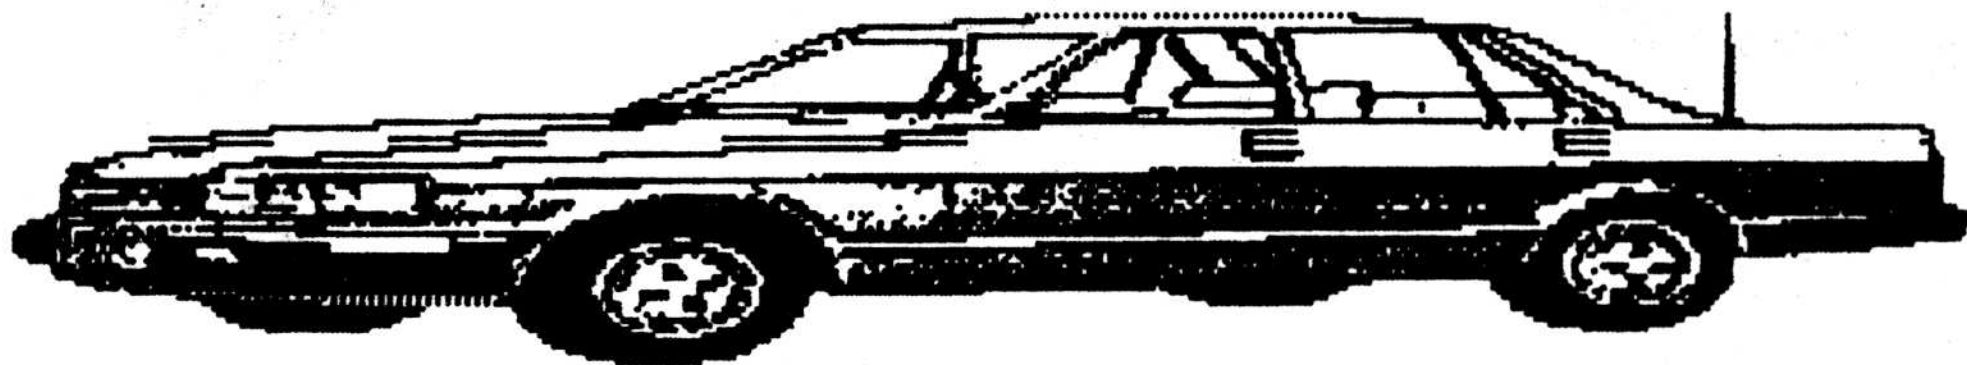

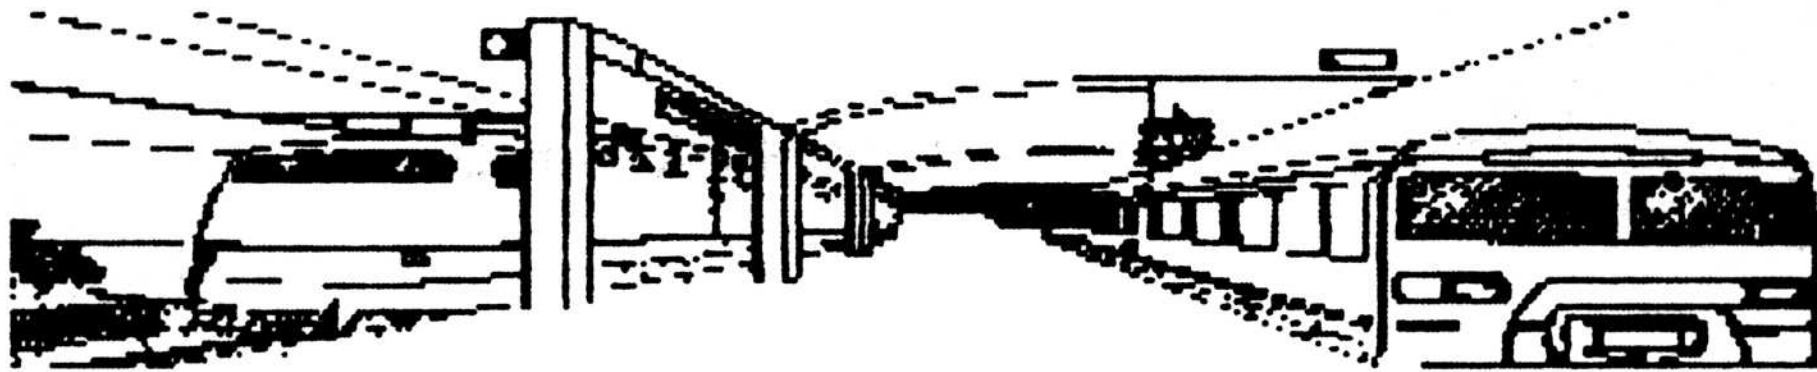

Personal Newsletter Fonts

These fonts can be found on side B of the Apple Clip Art disk. To load these fonts, follow the instructions in your Personal Newsletter manual.
