## Keyboard Equivalents

| Key   | Function                | Key    | Function                       | Key    | Function             |
|-------|-------------------------|--------|--------------------------------|--------|----------------------|
| space | cursor location         | m      | snap to midpoint               | enter  | enter coordinates    |
| click | cursor location         | n      | construct normal/perpendicular | delete | undo                 |
| a     | snap to angle           | o      | snap to object origin          | %      | undo                 |
| b     | snap to boundary/object | p      | pan to point                   | 0 - 9  | set object priority  |
| c     | snap to closest point   | r      | grid snap on/off               | esc    | special function     |
| d     | redisplay               | s      | set construction point         | ^      | esc                  |
| e     | restart current command | t      | construct tangent/parallel     | [      | coordinate entry     |
| f     | full view               | u      | zoom out (unzoom)              | .      | zoom window          |
| g     | grid display on/off     | v      | snap to nearest vertex         | +      | last object selected |
| h     | snap to opposite vertex | w      | -----                          | -      | last object created  |
| i     | extend to intersection  | x      | horizontal lock                | #      | change crosshairs    |
| j     | snap to junction        | y      | vertical lock                  | =      | view actual size     |
| k     | close current object    | z      | zoom in                        | \no.   | remember window      |
| l     | line lock               | return | end current command            | /no.   | recall window        |
