

Updater for Yamaha Plug-in Effect 01X Channel Module V1.1.0 for Mac OS X (VST) Release Note

Thank you for using Yamaha products.

This updater will update the software 01X Channel Module for Mac OS X from version 1.0.0 to 1.1.0.

To confirm the version number:

You can confirm the current version of "01X Channel Module" as follows:

1. With 01X Channel Module running, open the plug-in's Edit Window.
2. Click on [YAMAHA] at the top left corner of the display.

NOTE

- In order to use this software, 01X Channel Module for Mac OS X version 1.0.0 must be properly installed.
- Your system must be Mac OS X 10.4 or later.
No system prior to Mac OS X 10.4 can be used.
- The corresponding DAW software in the Cubase series is Cubase 4 (including Studio 4 and AI4) or later.
If you are using Cubase SX3 or earlier (including SE3), the update is not necessary.

New features in this update:

V1.0.0 to V1.1.0

- Support for Macintosh computers using Intel processors has been added.
- Support for VST2.4/Cubase 4 has been added.

Installation:

1. Double click on "01X_Channel_Module_VST_110_Updater" in the folder
2. Follow the on-screen instructions
