

# Installing Harpoon Classic CD-ROM for Macintosh® Computers

Insert your Harpoon Classic CD-ROM into your Macintosh CD-ROM caddy and CD-ROM drive.

You should see several files, but two will be labeled:

**HarpoonClassic SMALL Installer**  
**HarpoonClassic LARGE Installer**

If you wish use the minimum hard disk space and run most of Harpoon Classic from your CD-ROM, use the SMALL Installer, or if you wish to keep all of Harpoon Classic on your hard drive, use the LARGE Installer.

The SMALL Installer requires less than 2 Megabytes of hard drive space, while the LARGE Installer requires less than 20 Megabytes of hard drive space.

To install Harpoon Classic, double-click on the Installer you desire. It will prompt you with a standard file box to locate the hard drive you wish Harpoon Classic to be installed on. When you have navigated to the right hard drive, click on the "Select" button.

Harpoon Classic will then be installed on your hard disk.

If you choose the SMALL Installer, you will need to accomplish one more item before being able to play Harpoon Classic from your CD-ROM drive.

Double click on the "Color Harpoon 1.5" icon which is in the "Harpoon Classic CD" folder on your hard drive. After the title screens you will be presented with the BattleSet Selection screen, but no BattleSets will be shown. Click on the "[F]ind BattleSet" button at the bottom center of the screen. You will be presented with a standard file box, which will let you navigate to your CD-ROM drive. Click on any BattleSet which appears on the CD-ROM in this standard file box and click the "Select" button.

Every time you run Harpoon Classic in the future, the program will remember to always look for your BattleSets on the CD-ROM drive.

**Please call Alliance at 305-423-4289 if you have any problems with installation.**
