PLAYING TRIAZZLE

SELECTING PIECES:

You can select any piece by clicking on it and holding the mouse button down (letting go of the mouse de-selects the piece). In a pile of pieces, clicking on any piece will bring it to the top of the pile.

MOVING PIECES:

You can move a piece by clicking on it and dragging it with the mouse button held down. When the piece is dragged over an open space of the puzzle, that space becomes highlighted. When a space is highlighted, the piece will snap into place if you release the mouse button.

ROTATING PIECES:

You can rotate a piece clockwise by quickly clicking on it. Windows users can rotate pieces counter-clockwise by clicking the right mouse button. Macintosh users can rotate pieces by holding down the Option key when you click. You can also rotate a piece when you're dragging it by tapping the Space bar.

SOLVING THE GAME:

When you solve a puzzle correctly, all the creatures in the puzzle will come to life. If your completion time was exceptional, you can enter your name in the High Scores List.
