

Compatibility Chart for Apache Strike version 1.2

To use this chart:

- Find your Macintosh in the vertical columns.
- Note Starting Method options in the horizontal rows.
- See the Key below for compatibility details.

STARTING METHOD OPTIONS

Starting the Macintosh with the Apache Strike game disk

Launching Apache Strike from hard disk (System 6.0.x)

Launching Apache Strike from hard disk (System 7.0)

Classic	LC	Plus	Portable	SE	SE/30	II	IIcx	IIcx	IIfx	IIsl	IIx
√	R	√	R	√	√	√	R	√	R	R	√
X	Y	√	√	√	√	√	√	√	√	√	√
X	∞	∞	∞	∞	∞	∞	∞	∞	∞	∞	∞

Key

√ = Apache Strike works fine.

∞ = All Apache Strike features work fine except helicopter blades do not rotate and there is no sound from L.I.N.D.A.

R = The System supplied on the Apache Strike disk is not compatible with the ROMs on this machine. Launch from hard disk.

X = Apache Strike is not compatible with this System on this Macintosh. Start the Macintosh with the Apache Strike game disk.

Y = Launch Apache Strike from hard disk using System 7.0.

Please see the Apache Strike Instruction Sheet for complete information on making backup copies, INIT conflicts etc.
