Amiga™ version shown

The #1 Coin-Op Game has come home, offering the breathtaking animation, digitized sound, and dazzling game play you've been seeking!

Aliens have destroyed your planet, setting you and the humans aboard the galactic cruiser **ARKANOID** adrift and searching for a new home. **You are the only hope.** Climbing into your vaus, you realize you must act quickly. You have some weapons, but against the certain danger that lurks ahead, sheer nerve is your greatest strength. Hurtling through icy space, who can help but wonder, "What's out there???"

- MULTIPLE LEVELS of mesmerizing brick formations, testing your reflexes and ability to make split-second decisions.
- WHIRLING KONERDS, PYRADOKS, TRI-SPHERES AND OPOPOS that you must dodge and destroy, or be destroyed!
- SPECIAL CAPSULES that can aid in your quest. When caught, one capsule will make your vaus expand. Another will equip you with a laser, enabling you to smash through alien obstacles. More capsules exist, but you must choose carefully...the decision, and the fate of the crew, are in YOUR hands!
- OTHER FEATURES: Arcade High-Score Table, Variable Skill levels, and more!
