WHAT'S NEW

Swamp Gas Visits Europe.

The fun way to learn European Geography!

The sequel to the award winning **Swamp Gas/USA**.

Help Swamp Gas, the lovable alien, explore the geography of Europe. Visit all the countries, capitols and points of interest. Discover interesting facts during "close encounters". When your mission is complete, relax in the Alien Arcade and enjoy one of three wacky arcade games.

Swamp Gas is appropriate for ages 6 and up. You determine the length of play by choosing a mission of 5 to 50 locations. Every mission is unique. Three levels of difficulty will challenge every age, while on-line help provides hints to geography novices. And up to 4 can play at once, making this the ideal family entertainment. Lively color, clever sounds, and humor add to the fun.

Swamp Gas Visits Europe
Explore Geography the Fun Way

Cogito.

This award winning strategy game has a deceptively simple premise: a square made of marbles is randomly mixed by the computer and you must restore it to its original shape. You may move rows and columns.

At each level the moves required to restore the original shape become more complex, and you must plan many moves ahead. Time is not limited, but the challenge is to reduce it to a minimum. With 120 levels Cogito will challenge the novice and the master strategist. A visually stunning game with relaxing background music.

Winner of the Best Mac Game of the Year trophy from Apple France.

Puzzle/strategy game

The Tinies.

The Tinies are about to invade Earth. To stop them, you must send them to their sleepers. But beware: the Tinies are uncooperative, and strange devices lurk in their bizarre ship.

To beat the clock, you must think ahead, and carefully maneuver these cute but unruly creatures around walls, arrow chutes, traps, and each other while they turn cartwheels, make faces, and tap on the glass, trying to get out. Wild animation, great sound effects, and continuous challenge await you in over 100 levels and 11 different landscapes! A great arcade/strategy game for ages 10 and up.

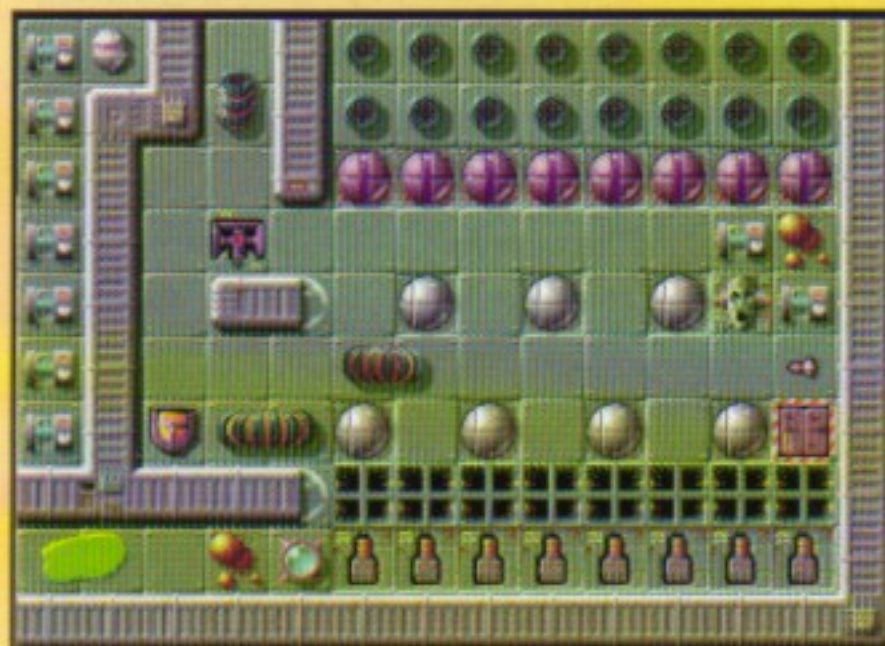

The Tinies
Arcade/strategy game

S.C.OUT

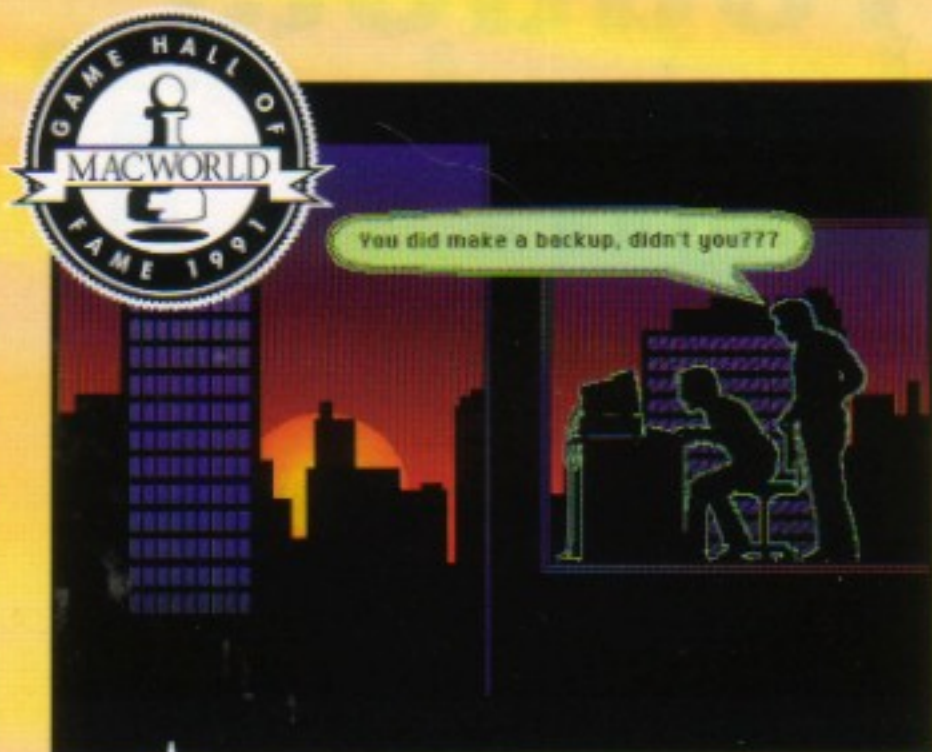

An abandoned moon base is about to be reactivated. But the base has been invaded by aliens, who now control its 100 sectors. You must seek them out and destroy them. Your arsenal includes bombs, missiles, and canon.

You'll need them all: the aliens have set up a host of nasty obstacles and surprises. Dazzling sound and artwork add to the fun. A puzzle/action game for ages 12 and up.

Games

3 in Three takes you on a madcap journey inside your Macintosh when a freak power surge zaps the number 3 off a petty cash report and abandons her in a land where numbers don't count and the letters spell disaster!

A tour dé force of animation and sound, 3 in Three is an interactive treasure hunt, an unfolding trail of word puzzles, logic dilemmas, and sinister brain twisters, over eighty in all. When all the pieces fall into place, an animated grand finale awaits those who help the 3 find true happiness! Designed to challenge adult game players, 3 in Three also appeals to young children who enjoy watching the colorful animation. Awarded the overall Best Game of the Year by MacUser 1991.

5 mice, MacUser

Swamp Gas USA. Explore the geography of the United States as an alien in a flying saucer in Swamp Gas. Visit all the states, cities, and landmarks on your itinerary and discover interesting facts during "close encounters". When your mission is complete, relax in the

Alien Arcade, where you can play one of three zany arcade-style games. With three levels of difficulty, four player capability, and a choice of four levels of detail, Swamp Gas is designed to appeal to adults and children of all ages who will love the digitized sound and wacky color graphics. Awarded the Honorable Mention for Best Children's Program of the Year by MacUser 1992.

Tesserae is a latin term for a type of ancient Roman mosaic of brightly colored glass tiles. It's also a puzzle game in which the player eliminates tiles from a 'board' according to color and texture. When only one tile remains a different, more difficult arrangement appears.

For the beginner, the object of the game is to remove as many tiles as possible. The more advanced player tries to improve their score by clearing the board in the fewest possible moves. A series of nine boards makes a game. It includes extensive animated on-line help illustrating possible moves. Elected 'Best Brain Game' in the MacWorld awards 1991. 4 1/2 mice, MacUser

Darwin's Dilemma 2.0 is a color strategy game loosely based on the ideas of evolution. The player must move through the 24 levels of this game by positioning, colliding, and merging icons that represent increasingly complex lifeforms. Each level brings a new puzzle to solve along with varied Rules of Evolution. But beware, like a classic board game, Darwin's Dilemma is easy to learn but difficult to master... and extremely addictive. Now you can create your own evolution rules with the level and icon editors in Darwin's Dilemma 2.0. 4 1/2 mice, MacUser

Mutant Beach. Stunning 256 color animation and 4 channel digital sound await you in the story of Native Nick, a totally laid back tropical islander. Nick, while on a fishing trip finds a note in a bottle telling him that the nose of the stone idol, guardian of the volcano has been stolen. Angered at the loss of his nose, the stone idol releases a cursed cloud from the volcano which, unless Native Nick can replace the nose, will mutate the island and all of its inhabitants. If adventure, intrigue, comedy, and a cast of characters beyond belief are for you, then sign on for a trip with Nick to Mutant Beach. Where fun is the name of the game and no one dies.

Utilities

Inline Sync *Powerful Powerbook synchronization*

Inline Sync is the full-featured Powerbook synchronizing application. It updates vital files between Powerbooks, desktop Macs, and hard drives, no matter where the files are stored. It synchronizes

automatically or on command. Use Inline Sync's browser interface to select ANY file or folder, or script selections by name, folder, type, and date. For safety, Inline Sync alerts you to identical files that have both been modified. Works through a network or SCSI port.

INITPicker 3

Stop INIT conflicts in their tracks

INITPicker shows you all the INITs on your system, lets you choose which to run and the order in which they load. You can even create multiple sets of INITs tailored for the particular work you plan to do. New network features let system administrators control which INITs are run on all networked Macs. INITPicker's BombGuard™ Incompatibility Detection prevents INIT conflicts from crashing your Mac at startup. BombGuard prevents the offending INITs from loading, and notifies you as to which INITs were skipped.

Among utilities that manage Startup documents (INITs) for the Apple Macintosh, Microseeds Publishing Inc.'s INITPicker 2.0 is by far the best. - MacWEEK

Rival *Fast, transparent virus protection*

Rival takes a simple, effective approach to virus protection: files are inspected as you open them. The process is instantaneous and transparent. If the file is clean, you won't be bothered: if the file is infected, Rival discovers it and repairs

the file before it's opened. Rival also lets you scan your entire hard disk or floppy if you prefer. A single Rival file takes care of both detection and repair, so there's no need to load a separate file when a virus is detected. Best of all, Rival provides timely, free updates via CompuServe™, APPLELINK, and the Microseeds BBS to combat new viruses. Or, if you prefer, you can buy a vaccine subscription at a nominal cost, and disks with the latest vaccines will be mailed to you automatically. 🐭🐭🐭🐭 5 mice, MacUser

Rival is the better choice for those who need speed and convenience. - MacWEEK

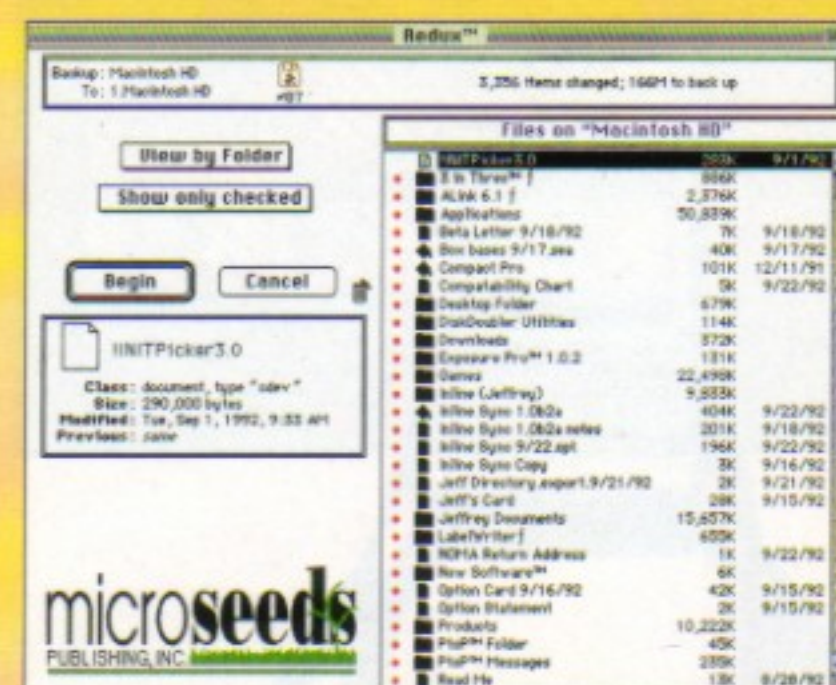

Redux *Simple, flawless backup*

Redux brings you painless backup, because anybody can trash a file or crash a hard disk. Redux lets you determine what gets backed up: your whole disk; several folders; only certain files; everything or everything except applications -

you decide. It has all the features you expect in a great backup utility: it's fast, and efficient, it re-uses backup disks (saving you money), and will verify backup disks. Redux features a built-in scripting language that lets you customize your backup - for instance, you can direct it to backup all Word documents in your correspondence folder less than two weeks old.

Redux strikes an excellent balance between power and simplicity. - Macworld

🐭🐭🐭🐭 1/2, 4 1/2 mice, MacUser

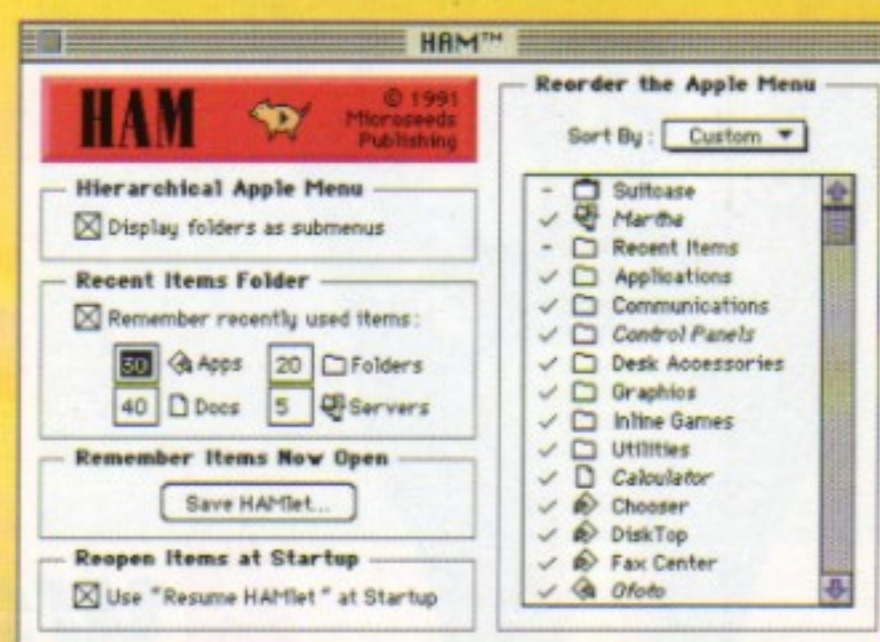

HAM *The fast, easy way to find and open your files*

HAM lets you display Apple Menu folders as hierarchical menus, so you can open items within them directly. HAM automatically adds your most recently used files, folders, and applications to the Apple menu - so the information you need most is at your fingertips.

Save common work sets as "HAMlets" - collections of multiple documents or applications that can be launched at any time. In addition, HAM knows to startup exactly where you left off the last time you used the Macintosh; if you choose, HAM will automatically re-open the applications and documents that were open when you last shut down.

HAM is a remarkable and well-designed product. . . For maximum control over the Apple menu, HAM is the package of choice... - MacWEEK
