Cnticed by the lure of exploring the unknown, you cross treacherous seas in search of the New World. But be warned! Europe's other conquering heroes are in pursuit of the same glory.

Conquest of the New World is a single- or multi-player strategy game that puts you in command of the explorers, settlers, and mercenary soldiers destined to survey the land, build new colonies, and protect your emerging nation. As you search for new rivers and mountains, you'll come across other colonies and encounter friendly and hostile native tribes. Your growing nation is constantly at the mercy of world events and the endless threat of surprise attacks.

Becoming a New World power takes cunning, ambition and the courage to venture into uncharted lands. Go too far, attack the wrong colony, or break a treaty and you could be faced with other colonial powers banding together to destroy you. Only through a perfect balance of diplomacy, exploration, trade and warfare can you build the ultimate nation, declare independence, and experience the true power of Conquest.

- Single- or multi-player action for up to six over a network & head-to-head with a modem or serial cable.
- Automatic settings for easy game-play or manual settings for detail management.
- Built-in tutorial to learn the fundamentals with easy-to-follow on-screen instructions.
- Victory can be achieved by exploration, building, trade or combat.
- Colonies come to life in stunning graphics and exciting 3D animations.
- Combat explodes with the echoing blasts of infantry, cavalry & cannons.

MACPLAY™

CD-ROM

Conquest of the New World™

You are about to embark on a new and exciting journey...one that will fill you with a sense of wonder and discovery. Light and sound will mix like a kaleidoscope to thrill you as never before.

At MacPlay, we believe that creating a new experience such as this requires more than just using the latest advances. Technology simply provides us with new tools to invent a product that is bigger, better and more exciting than anything we've ever done before. And the CD-ROM provides us with a larger canvas on which to create our vision.

What makes this title unique is how we have used this new medium to develop an entertaining product. Our approach is similar to an integrated Hollywood studio where we combine the talents of many creative individuals. Writers who put thoughts into words. Artists who give words an image. Musicians who enhance the image with sound. And programmers who magically combine technology with art to make it all a reality.

Our producers challenge all to create a product that will bring many hours of quality Macintosh entertainment. Every step of the way our staff is totally dedicated to this goal. But all of these efforts would be in vain if you should have a problem, however minor, with your purchase. Your satisfaction is very important and our customer service department is here to help—so please put them to task.

MacPlay is committed to providing you with the highest quality entertainment products in the market for your enjoyment. I'm very excited about the direction we're heading and I'd like to thank you for giving us this opportunity to share our vision.
