# Be the boss of any team--

Yesterday's Legends... Today's Stars... Tomorrow's Greats!

## THE GAME.

**D**on't read on if all you're looking for is a boring joystick game with imaginary players. Because MicroLeague Baseball II offers you far more — authentic performances, featuring real-life players and accurate stats. That's why MicroLeague challenges your *head*, not your eye-hand coordination.

Ever second-guess the moves of your favorite team? Can you outthink a rival team's manager? Ever dream of being a manager yourself, pacing the dugout as you make pennant-winning decisions?

Fulfilling these fantasies is what makes MLB II the *ultimate simulation*! It lets you boss *actual* major leaguers! You set up and change lineups, pick your spots for pinch hitters and relievers, decide when the players will steal, bunt or do a pitchout — in short, make every managerial maneuver in every game.

## THE SYSTEM.

More than just a game simulation, MLB II gives hard-core fans like you everything you need to play your favorite pastime 365 days a year! Just check out what's included in every MicroLeague II Library System:

### Box Score

- Sports Page Detail! • Automatically produced, can be printed out.

### Stat Compiler

- Store/update players' performance records in *cumulative* fashion after any game and for the season.
- Great for league play and record keeping!
- Use these stats in MLB II Games, stats resulting from *your* managerial strategy!

### General Manager/Owner Functions

- Create your own "dream" team — players from any team, any time period. Then play these rosters in MLB II games.
- Trade and draft players, "wheel & deal" just like real GMs and owners.
- Give players their Unconditional Release, put them on the Reserve List, or bring up promising rookies from the minors.
- Change your rosters/stats as a season progresses. A "must" of course, for fantasy and MLB League play!

## MLB II's FANTASTIC FEATURES.

Natural grass, IBM w/EGA

- Superb graphics — for IBM/Tandy/compatibles (tailored for EGA with CGA/VGA and Hercules support). FULL COLOR for Atari ST, detailed black and white for Mac. "Freeze-frame/Slo-Mo" for ALL systems!

Artificial turf, IBM w/EGA
