WHAT IS SHAREWARE? The name "Shareware" is a universal designation for software programs that are distributed through a unique marketing concept. These programs are not demonstration disks, but are fully operational programs. This software originates from major libraries, the program's author, or from computer bulletin boards, and is guaranteed virus-free.

What makes this concept unique is that it allows the purchaser to buy some of the best software available today at a minimal cost. In this way, the authors can market their programs and receive a modest registration fee (depending upon the author) only after the purchaser knows that the software really does the job and that they will use it.

WHAT CAN YOU EXPECT FROM SHAREWARE? These are fully operational computer programs. It is assumed that you, the purchaser, have some basic computer knowledge and are aware of the capabilities of your particular system. You may contact the authors at any time during the initial trial period and receive in-depth technical support. If you wish to continue using the program after a trial period, you may register the program and receive continued support, any manuals and instruction booklets, and updates. If you don't use the program, please pass the disk on to others who may benefit.

USING SHAREWARE. Make backup copies of your SHAREWARE diskettes following the appropriate instructions for your computer. Read through the program documentation thoroughly, as any questions you may have might be answered there, and you might want to contact the author directly. If you have any trouble getting your programs started, and you have followed the above instructions, call the telephone number listed on the diskette label for help.

The producer of this SHAREWARE, is an approved vendor/manufacturer and associate member of the Association of Shareware Professionals.

Thank you for your support of the SHAREWARE concept.

COLLEGE SUPPLIERS COMPANY, INC.

642 Ridgewood Road, Ridgeland, MS 39157 is a distributor of SHAREWARE.
