

## Avid Cinema 55xx/65xx Extension ReadMe

### Who Needs the Avid Cinema 55xx/65xx Extension

Avid Cinema extension, version 1.1.2 supports Power Macintosh 55xx/65xx model computers. If you are installing Avid Cinema on a Power Macintosh 55xx/65xx model from version 1.1.1 of the Avid Cinema kit (which did not support 55xx/65xx machines), or if you have moved the Avid Cinema card and software from another machine to a Power Macintosh 55xx/65xx, you need version 1.1.2 of the Avid Cinema extension.

If Avid Cinema came pre-installed on your 6500/275, or if you installed the Avid Cinema software from the 1.1.3 version of the Avid Cinema kit, the 1.1.2 version of the Avid Cinema extension is already installed and you do not need to download this extension.

### Installation Instructions

- 1) Click on the Avid Cinema Extension for 55xx/65xx Models file to download it to your desktop.
- 2) Open your hard drive.
- 3) Drag the new Avid Cinema extension onto your System Folder.
- 4) When you get the message asking if you want to place this into your extensions folder. Click ok.
- 5) When you get the message asking you if you want to replace the Avid Cinema extension file that already exists in there. Click ok.
- 6) Restart your Macintosh.
