Lind Battery Utilities 500

For use with PowerBook 500 series that have not been upgraded to Power PC.

Installation Instructions

1. Insert the floppy disk into the PowerBook 500 series floppy drive.
2. Drag the file named "BU 500 Deluxe" onto your hard drive.
3. Drag the file named "Battery Capacity CS" into the Control Strip Modules folder located in your System Folder.
4. Restart your Macintosh.

Note: (The files found in the "Assorted Control Strip Modules" folder are shareware programs and are not a required part of the BU 500 program. They are installed by being dragged into the Control Strip Modules folder located in your System Folder.)

Starting the Software

1. Double click on the file named "BU 500 Deluxe".
2. Operating instructions are found by clicking on the desired Topic in the left hand window.
3. The right hand Discussion Window then displays the desired information.
