What's new in Expression3: I've created some images to use for reflection  
maps.

# I regret that the aqua style was created by Mr. kabi ... (laughs) I  
created it with Bryce2 and processed it a little with Photoshop 7.1J.

Oh, only the cafe is a fisheye photo taken with Coolpix885 + Fisheyeconverter  
FC-E8.

Marble size may be a little difficult to use (^\_^;

E3 / Images / EnvMaps' Put it in the folder.

It is copyrighted. If it is non-commercial, please use it freely.

At that time, which reflection map I would be grateful if you could state that  
you used.
