. . . and thanx for taking the time to download Garcia's Guitars. Hope you can dig it. This is a cool non-violent game for the flowerchild in all of us.

First of all, let's get the formalities out of the way, -a moment of silence please, out of respect for the Dead. Sure, we all miss Jerry, but we'll meet up again in the by-and-by, you betcha!

Until then, . . . *let's play a game! YIPPIE!*

Hey look! -It's Jerry being chased around a parking lot by a buncha Pigs!

To play Garcia's Guitars, just use your mouse. Wiggle Jerry around some, get the hang of it, but keep away from Pigs!

They'll chase Jerry all over the place. They can't really bust him though, because . . . first of all, they got nothin' on him and . . . secondly, he's friggin' dead, man! You can't put a ghost in jail, jeeze. All they can do is make him wait while they run downtown to do the paperwork. It gets rid of a Pig, but it takes up Jerry's valuable time. He's gotta stand there and wait for the wheels of justice to do their thing before he can resume moovin' and a groovin'. He goes like this when he's free - "Excellent!"

Now, being chased around a parking lot by the Fuzz is no fun at all and certainly not a productive way to spend an afternoon. So get Jerry to hug guitars. When he hugs a guitar, it disappears and is sent to Rock n' roll heaven, where people like Jimi and Janice are Jammin'. Hugging guitars gives Jerry extra Karma points. Karma points are good. uh-huh.

Neither Jerry or I are makin' any big-bucks at this gig, but that's cool. You can't live on bread alone, man. So there's Brain Candy floating around sometimes. A Hookah, Sugarcube, or Jack-o-Roses will give Jerry more points. "OOOoooooh . . ."

This game is \$10.00 Shareware. If you like this game, you can use the handy RegisterGarcia application included. Or you can send it to me at;

I'm an artist, man. I'm no musician (and I'm basically just a hack when it comes to computers), but if you're kind enough to want to hear what it sounds like when I play guitar, just click this button and I'll lay one of my favorite licks on you. ...Don't worry, I'll keep my day-job.

Oh yeah, here's the usual disclaimer:

I'm not responsible if this product screws up your machine (which it won't, because I told it NOT to) or makes your computer come to life at night and start waking up the neighbors with loud off-key singing and dancing under the moonlight with bells on it's ankles. That's my NEXT PROJECT. Moo-ha-ha! And those fools at RadioShack said it couldn't be done!!!
