SMART Ideas®

Concept-Mapping Software

Engage students with visual learning techniques

Enhance lessons using interactive concept maps and multimedia

**Encourage** creative thinking in your classroom

Fill your classroom with ideas!

Ideas are exciting! Energize your classroom and captivate students with this creative visual learning tool. SMART Ideas concept-mapping software gives you and your students the power to brainstorm, turn abstract ideas into easily understood visual maps and organize thoughts and images into roadmaps for learning.

Use colorful shapes, cool connectors and a collection of curriculum-specific clip art to enhance your lessons and engage students. Attach hyperlinks to create multilevel concept maps so students can delve into the details. Then add multimedia to your maps by making files, videos and Web sites accessible with a single mouse click.
