ABOUT ITALY PRIDE 4.2.2 (v1.0)
```
=========================================
```

```
----------
```
DESCRIPTION
```
----------
```

Italy Pride is a Eudora plug-in, which localizes the application into Italian. The plug-in solution is very handy: just take it out of your Eudora Stuff folder and re-launch Eudora to revert to the original localization.

The idea of not to alter any data or setting of your existing copy of Eudora, guided me through the entire work: intentionally, the plug-in WILL NOT localize common file and folder names, such as "Eudora Settings", "Eudora Folder", "Eudora Nicknames", etc., and won't translate the default mailbox names "In", Out" and "Trash", and the "alternate" term. This was made to keep Italy Pride fully compatible with any data and setting your English version of Eudora was already dealing with.

On the other hand, balloons, online help, extra and third party plug-ins, and electronic documentation, have not been translated because they are not embedded in the application resources.

Send bug reports and suggestions to: <gabble@mac.com>.

```
--------------------
```
IMPORTANT INFORMATION
```
--------------------
```

I strongly recommend that you make a backup copy of your existing Eudora Folder (normally in your System Folder or Documents Folder), and put that copy in a separate area. You should also back up your Eudora Pro application folder and put that copy, too, in a separate area. Then you can safely install the Beta software as directed below under "Installation."

CHANGE NOTES FOR ITALY PRIDE 4.2.2
```
------------------------------------------------------------
```

4.2.2 (v1.0)
   - first public release.

```
------------
```
INSTALLATION
```
------------
```
To install Italy Pride:

1. Make a backup copy of your existing Eudora Pro 4.2.2 application folder, and make a backup copy of your existing Eudora Folder (normally in your System Folder or Documents folder), and put those copies in a separate area.
2. Quit Eudora Pro 4.2.2 if it's running.
3. Place the "Italy Pride 4.2.2 (v1.0)" plug-in your Eudora Stuff folder.
4. Launch Eudora Pro 4.2.2.

```
--------------------
```
MINIMUM REQUIREMENTS
```
--------------------
```

To use Italy Pride 4.2.2 (v1.0) you must have the following:

* Eudora Pro 4.2.2 for Mac OS, installed and working.

```
------------
```
DISCLAIMER
```
------------
```

DO NOT install Italy Pride over different Eudora version or releases: It could be risky and damage your existing data.

This software is provided "as is" and without any warranty.
