Read Before You Install GarageBand Jam Pack

Welcome to GarageBand Jam Pack, a companion to GarageBand, Apple's music creation application that's available in the iLife suite. GarageBand Jam Pack provides:

- Over 2000 Apple Loops in a variety of instruments and genres
- Over 100 additional GarageBand Software Instruments
- Over 100 additional audio effects presets
- 15 new guitar amp settings

System requirements

GarageBand Jam Pack requires the GarageBand application installed and Mac OS X version 10.2.6 or later. A Macintosh computer with at least 256 megabytes (MB) of memory and a 600 MHz PowerPC G3 is required to use Apple Loops (a G4 or G5 processor is required for Software Instruments). You need 3 GB of free disk space to install the GarageBand Jam Pack media.

Hardware compatibility

GarageBand Jam Pack is a companion product to GarageBand, which can operate with any Core Audio- and Core MIDI-compliant audio interface. You may need to install additional drivers from the manufacturer of the audio interface in order to provide full Mac OS X support. For a list of supported audio and MIDI interfaces that work with GarageBand, see the GarageBand website at www.apple.com/garageband.

Installing GarageBand Jam Pack

To install the Apple Loops, instruments, and effects available in GarageBand Jam Pack:

1. Insert the Install DVD.
2. Double-click the Install DVD icon on your desktop.
3. Double-click the Install icon and follow the onscreen instructions.
