MacDrawTM Pro

Powerful graphics standard for the Macintosh.

MacDraw™ Pro

Flexible floating palettes.

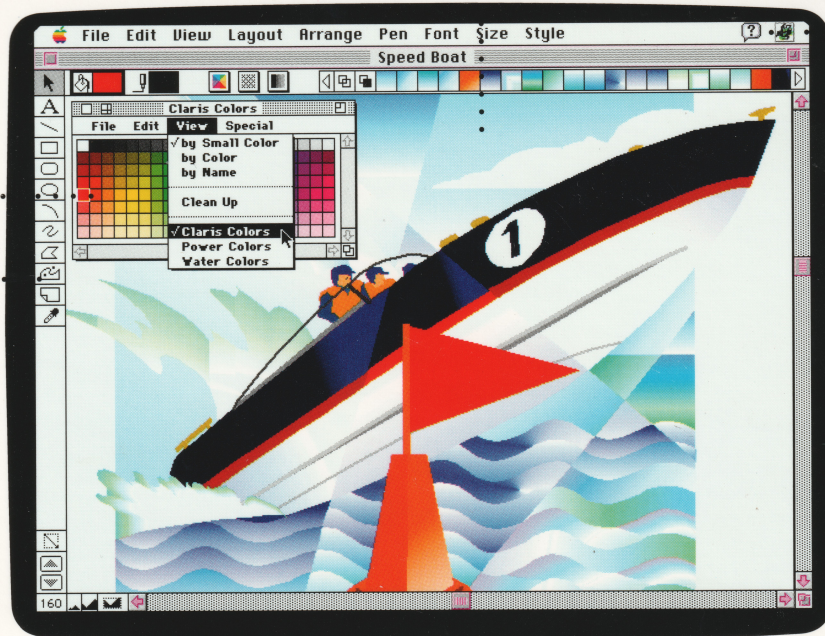

Tear-off palettes give you customisable, easy access to your favourite graphic effects and features. View colours in palettes by name for precise selection. Save and share custom palettes across documents or with a workgroup.

Streamlined designs with impact.

Powerful, accessible tools help you create anything from stylised text to the most elaborate drawing. Create curved objects faster and more intuitively than ever before with special bezigon and polygon tools.

Powerful gradient fills.

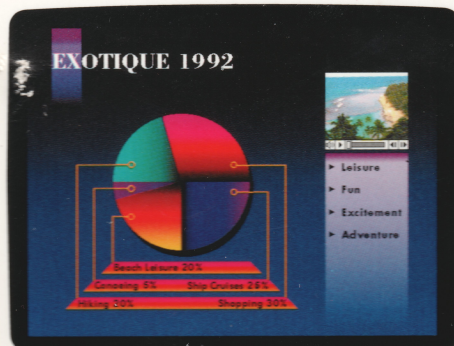

MacDraw™ Pro software offers three types of gradient fills to quickly add highlights to your graphics. And, MacDraw Pro can take full advantage of all of the colours your Macintosh can provide.

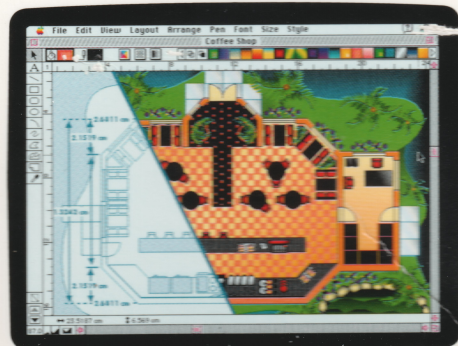

Complete System 7 functionality.

Link to other applications with Publish and Subscribe so your files are automatically updated. Balloon Help offers quick information on unfamiliar tools. And, QuickTime brings your drawings and presentations to life with sound and video.

Deliver dynamic presentations with full System 7 support—for example, QuickTime adds multi-media flair to your presentations with sound and video.

MacDraw Pro lets you draw to any scale with predefined or custom rulers—making it a great choice for floor plans and other designs. Autosize lines let you add basic dimensions to your drawings.

With MacDraw™ Pro

Use one application for all your graphic needs

- ▶ Publish—newsletters, invitations, flyers, forms, cards
- ▶ Present—on screen, overheads, 35mm slides, handouts
- ▶ Illustrate—charts, logos, maps, publications
- ▶ Design—floor plans, landscapes, layouts, product concepts

Create sophisticated drawings with ease

- ▶ Draw structured or freeform graphics easily with tools that create polygon, bezigon, or freehand objects, and more
- ▶ Edit objects quickly and accurately with interactive reshaping and smoothing capabilities
- ▶ Scale, rotate, and align objects with precision

Add impact to graphics with colour, shading, and grey-scale

- ▶ Access up to 16.7 million colours, or full grey-scale tones
- ▶ Customisable gradient fills to create shading, highlighting and other special effects
- ▶ Use PANTONE® colours for easy colour matching

Communicate clearly with extensive word-processing capabilities

- ▶ Improve readability and visual impact with tab, indent, justification, and margin controls
- ▶ Add emphasis to text with letter and line spacing, and custom style options
- ▶ Correct errors with built-in 100,000-word spell checker

Extend your investment with file sharing

- ▶ Publish and Subscribe makes sharing text and graphics across files and other programs automatic
- ▶ Save and open PICT, PICT2, MacDraw II files, and more
- ▶ Import scanned MacPaint™, TIFF, or EPSF images
- ▶ Export accurate, high-resolution graphics with EPSF format

Make your presentations persuasive

- ▶ Add multi-media flair with QuickTime movies or images
- ▶ Create a master background and organise slides by title
- ▶ Print handouts with 2, 3, or 6 slides per page

Minimum and recommended equipment requirements

- ▶ Macintosh Plus, Classic, Portable, SE, LC, PowerBook, Quadra, or II family (SE/30, LC, II family or Quadra recommended)
- ▶ Hard disk drive
- ▶ 2MB memory (4MB with System 7 or for millions of colours)
- ▶ System software 6.0.5 or later (System 7 for full use of Apple events, Publish and Subscribe, and QuickTime features)
- ▶ Supports virtually all printers—colour or black and white
