Clutter
Copyright ©2006 - http://www.sprote.com/clutter/ - Sprote Rsrch
Clutter is a small Mac OS X application that lets you put music CDs on your desktop.
You can drag them anywhere -- they're really windows.
Each one looks like the real CD's cover, and double-clicking it tells iTunes,
or your SqueezeBox (?) or SoundBridge (?) to play that CD.

iTunes Publisher 4.1.1
Copyright ©2004 - http://www.TranceSoftware.com
iTunes Publisher 4 exports playlists from iTunes into the following formats:
Tabbed-Text: Import your playlist into databases or spreadsheets.
Quicktime Streaming Server: Create QTSS playlists easily "*so you can avoid the annoying
interface provided by Apple*".
M3U: A general playlist format. Works with WinAmp and some other audio applications.

This was my "favourite" Imagebrowser, from the 1000 availables, back in 10.2/3/4.
(Be Fast, Be Clean, Be Cheap - Age of Chance)
But it always crashed in 10.5, unexpected error...
`Til i found out, i just had to remove the UniBinary with TrimTheFat by splook.
"Yeah, make PPC great again!"

Kill Bill G. Someone has to rewrite this game.
Kill Steve, but this already happenend.
Sometimes i must use os 11.11 (The Bubblegum Version)
for banking, ebay and all the stuff, TenFouFrox could not handle.
To make it work (os 11.11...12.3) as i want it to,
i have to go to the Terminal, in 2022!!!
