CRAZY CARS
by TITUS
"The craziest car race"

I - GETTING STARTED

1 - On MAC 512 E / MAC PLUS / MAC SE :

Turn on your MAC, then insert the system disk into the drive (or boot from the hard disk).
Insert disk 1 and double-click on the "Crazy Cars" icon.
You may copy CRAZY CARS onto a hard disk. We recommend you make a back up of the disk (using the FINDER).

2 - For the color version on MAC II / MAC II X / MAC II CX :

Copy disk 2 onto the hard disk (the first time only).
To start, double-click on "CRAZY CARS color" icon.

II - COMMANDS

- On MAC 512 E / MAC PLUS / MAC SE and MAC II :

On the keyboard or on the keypad, the commands will be interpreted as follows :

8 or S .... Accelerate
5 or 2 or X......................... Brake
4 or J............................... Turn left
6 or K............................... Turn right
O................................... To quit

During the game, the TAB key saves the screen (under "screen" index). It will then return to the FINDER.
At the start of the game, select the speed according to your computer's microprocessor.
Each time the screen seems frozen (for example while the music is playing), press the 8 key on the keypad to jump to the next screen.
The ENTER key on the numeric pad ends the game and goes back to the Finder. The "backspace" key stops or starts the game (pause).
When the game ends, put your name next to your score.
This is done by selecting the letters of your name one by one with the cursor. The alphabet is moved with the mouse.
Up to seventeen letters can be selected.
Once your name has been entered, store it by clicking the last symbol of the line. Your new score has now been placed among the other scores.
