

QUICK START CARD

The Software Toolworks® Presents...

Macintosh® Version

SYSTEM REQUIREMENTS

- Macintosh with 256 color, 13-inch monitor or greater
- At least 4 MB of RAM with 2.5 MB available
- System 6.0.7 or later
- Macintosh-compatible CD-ROM drive with 150 KB/sec speed or faster

INSTALLATION

1. Start your CD-ROM drive and Macintosh.
2. Put the Oceans Below disc in your CD-ROM drive. A folder automatically opens entitled, Oceans Below, and three icons appear.
3. If you do not already have QuickTime™1.6 or higher, drag the QuickTime icon into the System Folder. (You may be asked if you wish to place QuickTime in your Extensions folder—click Yes.) If you have an older version of QuickTime, discard it before restarting.
4. Restart your Macintosh so that QuickTime is loaded into memory before running the program.

STARTING UP

1. Double-click the Oceans Below icon to begin the program. A screen with important information about the program appears. After you read it, click the mouse to continue.
2. The opening screens of the program play, then the Introduction and Begin Program commands appear in the sand on the title screen.
3. To get a brief description of the Oceans Below program, click Introduction. To go directly to the beginning of Oceans Below, click Begin Program. You will get a quick explanation of the functions of the icons.
4. To plunge into Oceans Below, click one of the icons in the sand at the bottom of screen.

**EXIT**

Quit the program at any time.

HELP

Get information about using the program.

DIVE INFO

Learn about dive equipment and the dive environment.

WORLD MAP

Explore worldwide dive locations.

TREASURE CHEST

Look at the list of treasures you've collected so far.

Hint: Before you begin a dive, click Dive Info to learn more about the sport of SCUBA. On the Dive Info screen, click any piece of equipment to find out about it, or click the book to learn details about the diving environment.

WORLD MAP

Whenever you choose the World Map icon, a schematic map appears.

You can click a bubble to go to a specific dive area. Click the World Map icon from any screen to return to the schematic map and choose another area.

REGIONAL MAPS

A regional map appears for some areas, so you can select a specific site to explore. From those sites you can choose either the World Map or Regional Map icon to go to another dive site.

From the World Map, you can click Site Attractions to view a list of attractions and their locations.

TAKING A DIVE

You can explore dive areas in depth by clicking these icons:

**Topside Information**

View an informational video about the dive area.

Sea Life Chart

Get more information about the sea life in a particular region.

Begin Dive

Join your dive masters and obtain your dive briefing in preparation for descent.

Descend

Start your diving adventures and get diving tips as you plunge deep into the sea.

Ascend

When you're finished exploring underwater, make your way safely back to the boat.

To learn more about what you see underwater, move your cursor over the scene. When a dive mask appears, you can click those animals, plants, or objects of interest.

Hint: During most, but not all dives, if you're lucky, you'll find buried treasure! If you think you've found something, just click to explore.
