What is the wingspan in feet of the MiG-17F?	31.0
What is the wingspan in feet of the MiG-21MF?	23.5
What is the wingspan in feet of the P-47D?	40.8
What is the wingspan in feet of the P-51D?	37.0
What is the wingspan in feet of the Yak-9?	32.8

Problems with the Game

Some CDEVS and/or INITS may cause problems with the program. CDEVS (control panel devices) and INITS (initializing programs) are memory resident programs on the Macintosh that can cause problems due to memory conflict. These programs load into RAM when you boot your computer. The most popular types of memory resident software on the Macintosh are virus-checkers and screen-savers.

These programs will be found in your system folder. Any files that you have added into your system folder may be loading memory-resident, and could potentially cause a memory conflict. In order to determine if you are having a memory conflict, create a temporary folder, place any unnecessary CDEVS and INITS in the temporary folder, and then restart your Macintosh. If you have system 7.0 or greater, you can avoid these programs (referred to in system 7 as EXTENSIONS) by holding down the SHIFT key while booting or restarting your computer.

Technical Support

If you have questions about the program, our Technical Support Department can help. If your question isn't urgent, please write to us at:

Electronic Arts Technical Support
P.O. Box 7578, San Mateo, CA 94403-7578

Please be sure to include the following information in your letter:

- Product name
- Model, memory, and configuration of your Macintosh
- Any additional system information (like type and make of monitor, video card, printer, modem etc.)
- System version number
- Description of the problem you're having
