# MIGHTY MORPHIN POWER RANGERS™

FIVE ACTION-PACKED SHOWS ON  
ONE INTERACTIVE CD-ROM!

**M**ighty Morphin Power Rangers,<sup>™</sup> the hot new children's TV series from Saban Entertainment, comes to CD-ROM in five exciting live action shows! Presented in the easy to use Matrix Interface<sup>™</sup> format from Xiphias, this disc allows you to mix and match scenes from different shows. Video, audio, text and graphics are right at your fingertips, providing hours of thrilling entertainment. Follow Jason, Kimberly, Billy, Trini and Zack as they battle an intergalactic sorceress who will stop at nothing in her attempt to conquer the universe. See the Power Rangers "morph" into costumed superheroes and burst into action with amazing fighting powers drawn from the spirits of ancient dinosaurs. Come along and join the Mighty Morphin Power Rangers in their world of adventure.

#### DEAR CUSTOMER:

Congratulations on your purchase of a Matrix Interface<sup>™</sup> title from Xiphias. We designed the Matrix to make storytelling on CD-ROM easy and enjoyable; easy for you to enjoy an exciting array of titles that share the same friendly interface.

We have already produced five Matrix Interface<sup>™</sup> titles, including the *Mighty Morphin Power Rangers*<sup>™</sup>, and we're working on many more. Once you've used this product you'll be ready to use every other Matrix Interface<sup>™</sup> title. We at Xiphias hope you enjoy this innovative approach to software; if you have any comments or suggestions, please let us know.

**MACINTOSH OPERATING SYSTEM REQUIREMENTS:** 68030\* or faster processor such as a Mac IIsi or better, Centris or Quadra. System 7.0 or higher. 2MB RAM free (4MB total RAM recommended). 2MB free on hard disk recommended. 640 x 480 screen or larger required (color recommended). 256 color mode (8 bit card minimum). CD-ROM drive and drivers.

**WINDOWS<sup>™</sup> OPERATING SYSTEM REQUIREMENTS:** MPC compatible. 386SX or faster processor, 25MHz or higher.\* Windows<sup>™</sup> operating system 3.1 or higher. 2MB RAM free (4MB total RAM recommended). 2MB free on hard disk recommended. SVGA card and monitor (256 color mode).

Microsoft<sup>®</sup> mouse or 100% compatible. CD-ROM drive supported by the Windows<sup>™</sup> operating system with latest drivers. Sound card supported by the Windows<sup>™</sup> operating system (Sound Blaster, Media Vision, Pro Audio Spectrum 16 or 100% compatible).

\*This is a digital video based product. Some video breakup may occur on machines with these minimum system requirements. Faster machines will display better video playback. A double-speed CD-ROM drive is recommended.

Screen savers may interfere with the operation of this disc. It is recommended that you turn off any screen saver while this disc is in use.

#### GETTING STARTED

This booklet contains enough general hints and tips to get you started. It is recommended that you check the README file on the disc for more detailed and thorough installation and operation instructions. If a screen saver is installed on your computer, it is recommended that you turn it off during installation and operation of this disc. Kids, check first with your parents and others who share the computer with you before you try to install the program on a hard drive.

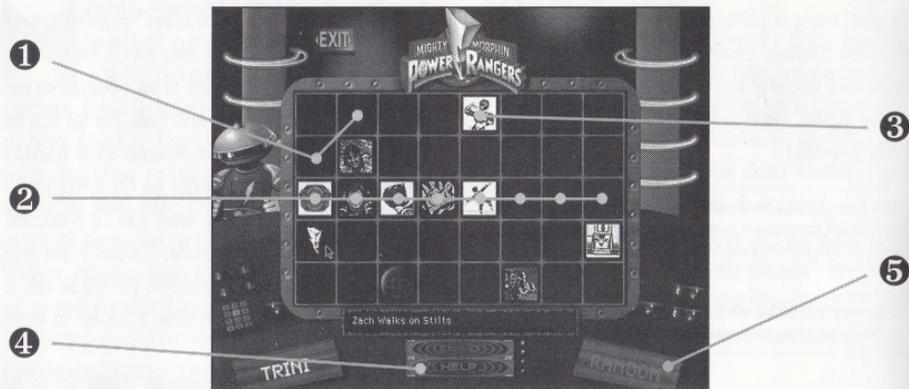

First, make sure the CD-ROM drive is hooked up properly and the computer is ready to play CD-ROMs. When you insert the disc in the drive, make sure the label side is facing up.

If your computer uses the Windows<sup>™</sup> operating system, you can run the program directly from the CD, but it will run faster if you use the Install program to put a directory on your hard drive and run the program from there. You can start the install process using the Program Manager under Windows<sup>™</sup>. From the Program Manager choose the File menu, choose Run, type the letter of the drive where your CD is mounted, followed by ":install" (for example: "f:install") and press return. Once the installation is complete you will be able to select the Matrix Interface<sup>™</sup> icon under Windows<sup>™</sup> to launch the program.

If you're using a Macintosh computer, double click on the CD-ROM icon to open the disc, then double click on the MATRIX icon to start the Mighty Morphin Power Rangers. For best performance, we recommend that you use the installer to copy parts of the program onto your hard disk (you'll need about 2MB of disk space).

#### TOP MENU:

When the program starts, the first screen shows the Top Menu. You may choose to watch a demonstration of the product by clicking on the button marked Demo, see the Credits by clicking that button, or go directly into the Power Rangers program by choosing the Matrix button on the screen.

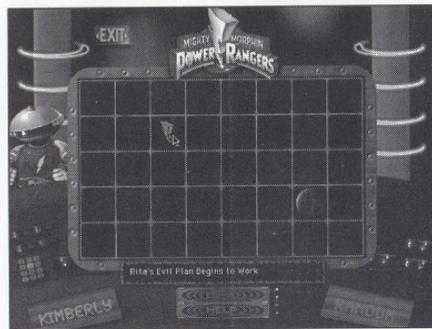

## THE MATRIX SCREEN

We created the Matrix Interface™ to tell stories. The Matrix on this CD has five horizontal rows; each row has eight squares called cells ❶. Each horizontal row ❷ of the Matrix is a different Power Rangers adventure. Behind every cell, there's a complete chapter from a Power Rangers adventure. Just remember, each story runs from left to right across the screen.

When you're done watching a chapter, the cell will change its look ❸, so you know which ones you've already seen. If you want to start over, you can make all the cells black again by pressing the Clear or Delete key on your keyboard.

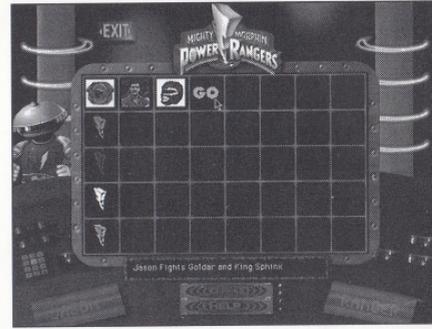

If you want to know more about any part of the screen, just hold down the Shift key on your keyboard, and use your mouse or trackball to move the pointer around the screen. Word balloons will tell you what every part of the screen is for. Choose the Help button ❹ if you want to know more about this screen.

The Mode button ❺ at the bottom of the screen lets you choose from three different ways of viewing the stories. Hold your pointer over this button and it will start to roll. Just click when you see the mode you want to try.

## RANDOM MODE

When you start the program, you are in Random mode, and can watch any cell in the Matrix just by clicking on it. When the chapter is over, you'll go right back to the Matrix. You can pick another chapter or move your pointer back to the Mode button and change modes.

## RANGER MODE

Each Power Ranger show in the Matrix centers on a different Ranger. In Ranger mode, you can watch a complete show straight through from beginning to end. Just pick your Ranger and click on the first cell in that row. If you want to skip a cell and move to the next chapter of the show segment, press the right arrow key on your keyboard.

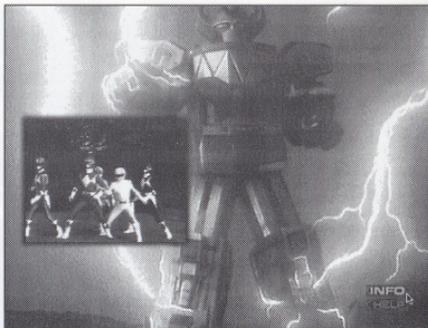

If you want to stop the playback and try a different show, or a different mode, press the escape key or the up arrow on your keyboard and you'll go right back to the Matrix.

### USER MODE

The User mode lets you create your own path through the cells in the Matrix. To make your own path, click your mouse on the cells you want to see, in the order you want to see them. Once you have made your selections, just click on the Play button. These chapters will play back automatically in the order you've chosen.

Little numbers will appear on the cells you've chosen, so you can see what order they will play back in. If you change your mind and want to take a cell out of the path, just click on it again and the number will disappear.

### MOVIE/STORY SCREEN

The Power Rangers play on a movie screen in the middle of the monitor. While you're watching some of the Power Rangers adventures, you may see a button on the screen marked "Info." Click on it to learn more about the Power Rangers and their world.

### INFO SCREEN

On the Info Screen, you can read more about the Power Rangers. You can scroll the text field up and down using the arrows or the slider on the side of the screen.

You can save this information as a text file or print it out, using the Save and Print buttons on the screen. If you have a printer, make sure your printer is properly connected before you try to print.

To go back, press the right arrow key on your keyboard or the Back button on the screen.

## KEYBOARD COMMANDS

Quit program:	Command (⌘) + Q	ALT + F4

## ABOUT XIPHIAS:

At its inception in the late 1970s, Xiphias introduced the first computer graphics system to local television news in Los Angeles. Subsequent projects led Xiphias to develop a core expertise in digital typefonts. Emerging technologies in the '80s afforded the company an opportunity to concentrate on a cherished goal: providing fine home reference products to help parents and their children learn together.

Xiphias has developed a number of original titles, such as the well-known *Time Table of History* series. This series currently includes *Business, Politics & Media; Arts & Entertainment; and Science & Innovation*. We have also created dynamic environments for acclaimed family reference products, such as the *Silver Palate Cookbooks* and the *American Heritage Illustrated Encyclopedic Dictionary*. At Xiphias we develop advanced search and interface technologies, and new creative approaches to delivering fine multimedia products. We're proud to be a leading innovator in CD-ROM publishing.

## ABOUT SABAN:

Saban Entertainment is a broad-based entertainment company specializing in the creation, production, acquisition and distribution of all forms of television programming and music for the worldwide marketplace. Saban Entertainment provides

programming in all day parts to all media including network, first-run syndication and cable television, feature films, home video and new media. The company is also a leading supplier of music for television, both domestically and internationally. Saban Entertainment is also the largest independent supplier of children's programming in the world.

## ORDERING &amp; UPDATES

Please fill out the registration card that came with this product. This will put you on our mailing list so that we may tell you about our new products and notify you of updates to existing Xiphias products.

## TECHNICAL SUPPORT

If you have any problems installing or operating this software program, refer to the README file on the disc. If you have further questions, please contact: Xiphias Technical Support at (900) 896-HELP. You must be 18 or older to use this service. The current charge is \$1.50 per minute for the first 2 minutes, \$2.00 per minute thereafter and will be charged to your phone bill. The charge per minute may increase without notice.

You might be wondering why we now charge for customer support. A few years ago we could charge over \$100 for our

CD-ROMs. Though we didn't sell many, the price was high enough to cover production, royalties, packaging, marketing, promotion, distribution and phone support as well.

Today, prices have dropped to the point where they are near those of home video products. In a few years, they will probably match the price of audio CDs. Even if our sales approach those of home videos and music CDs, there will still be a difference. . . we have to help you on the phone.

We have struggled to make our products effortless to install and easy to use. Normally, you shouldn't have to call us. But we do get support calls. Sometimes people have trouble with our products, and we do our best to help them. Most of the time, folks are just struggling to master the complexities of their systems. We help them fiddle with device drivers, autoexec.bat files and the rest of what the Wall Street Journal called the "dark side of home computing."

It's not really our business, but we can't turn you away. So we charge. We made the charges for short calls low, and the long support calls are progressively more expensive. We've tried to be fair and hope you understand. If you want to drop us a note and tell us how you feel about this new policy write us at:

Xiphias  
8758 Venice Boulevard  
Los Angeles, California 90034

#### PRODUCT REGISTRATION

Please fill out the enclosed registration card and send it to us at your earliest convenience. This will confirm your warranty and ensure that you receive information about future upgrades. Please make a photocopy for your records and return the original to us.

#### LIMITED WARRANTY

This product is subject to certain warranties and disclaimers of the warranty that are set forth in the license agreement included in the package for this product.
