# LEGIONS

CONQUEST AND DIPLOMACY IN THE ANCIENT WORLD

# In the ancient world, a sharp mind could take you far. But a sharp sword would take you farther.

Since the beginning of recorded history, mighty empires have emerged to dominate the world, only to crumble into dust.

**Legions** lets you relive the most glorious struggles for power in the ancient world. The Peloponnesian War, Caesar's conquest of Gaul, and the rise of Charlemagne are among the 10 challenging scenarios which will test your empire building skills in this detailed strategy game.

In **Legions**, as in life, there's more than one way to conquer the world. As the leader of an empire, you must balance diplomacy, economic manipulation and military strategy to attempt to overwhelm your opponents. You must position your armies strategically, then lead them into battle — where you may taste the bitter dregs of defeat, or bask in the glory of victory.

When diplomatic and economic maneuverings fail, let loose the dogs of war!

Conduct diplomacy to ensure your empire's survival.

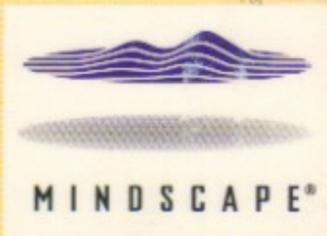

Negotiate, barter, sign treaties, give gifts. But beware of treacherous alliances!

Detailed maps show you where to place your armies — and where your enemies have placed theirs.

- ◆ Ten historical scenarios (from 1200 BC to 800 AD).
- ◆ Up to 5 people can join in the fun over a network (multiple copies required).
- ◆ Richly-detailed 256-color graphics.
- ◆ Print campaign maps for planning your strategy (Windows version only).
- ◆ Unique role playing opportunities — (king, economic minister, diplomat, general, and more).
- ◆ Realistic market economy simulator.
- ◆ Random scenario generator for those who want to write their own history.
