Penguins Arena

Sedna's World

PENGUINS ARENA by Frogames

Basics

You are part of a Penguin tribe. Your mission is to ensure the survival of your clan by ejecting others from your iceberg. If you' are ejected, you will be reincarnated if it remains at least one penguin in you tribe. So be careful.

History

It all begins when a penguin legend comes to life in the form of Sedna, the ancient Penguin Goddess that every Penguin grew up knowing, but none had ever seen – until today.
Gathering the endangered Penguin tribes around her, she utters these fateful words:
 "My Penguin children hear me well. Starvation and chaos are upon you. There is room for but one tribe. That is the price survival."

Now it's your turn to join the snowball battles and drive the other tribes into the sea. Penguin Arena is a thrilling and innovative First Penguin Shooter with very short rounds and where the magic of reincarnation, combined with the supernatural ability to return to the game as a ghost, ensures that your character has every chance to change your tribe's fate.

Key Features

- 5 different weapons and bonus
- Up to 4 penguins tribes
- 10 different Icebergs
- Cute and colored cartoon graphics
- Short rounds and furious gameplay
- Player interaction, even after death
- Reincarnation system
- Multiplayer game (LAN or Internet)

Background

Ignored for years, global warming has finally taken its toll. The icebergs are melting and the fish are vanishing. It's up to you to save your Penguin tribe from disaster. Can you handle the task?

Penguins Arena is a fun and challenging game with an underlying message that's as real as today's headlines. What a great way to combine fun, computers and gaming to convey an urgent environmental message to people of all ages.

Controls

W : move forward
S : backward
A : strafe left
D : strafe right
U : chat (full game only)

Save the Penguins, Save the Planet!

Based upon the very real threat of mass extinction due to global warming and pollution, Penguins Arena drives a serious message cloaked inside of a fun and challenging game. Help spread the warning about global warming, excessive fishing and pollution that threatens the survival of all species through habitat loss and destruction of the food chain.

Don't let the penguins die and don't stand by and watch the planet suffer this disastrous fate. Each one of us has the ability to change the world with simple acts in our everyday life. Today, it's your turn.

Intel Laptops

On September 5, 2007 Intel announced that Penguins Arena was selected as the grand prize winner entry of the **Best Game on the Go** contest.

The key features implemented in Penguins Arena for this contest are:

- Wireless signal strength displayed.
- Automatic selection of Power Scheme
- Screen Brightness and game performances depending on current battery capacity and current power source.
- Capping framerate to monitor frequency when battery power is under 50%.
- Alerts displayed when battery or wireless signal are low.
- Options to allow player to disable Intel tests and to make Wifi and Battery GUI elements invisible.

All this features are available only on Intel laptops running Microsoft Windows.

As Penguins Arena theme is related to global warming we worked hard on trying to reduce power consumption of the game. The Intel Laptop Gaming TDK helps us in this way.
The three main features to achieve this goal are the management of screen brightness, the automatic selection of Power Scheme and capping of the framerate. This last feature is available to everybody (not only to Intel laptop users) in the Options panel (VSync parameter).

About Frogames

Launched in Reims France during 2005, Frogames is in the capable hands of three motivated and fun-loving people who are environmentally aware.

Meet The Team:

- Christophe, Artist and Co-Founder
- Mathieu, Programmer and Co-Founder
- Sabine, Promotion, Marketing and Communication

We are Indie Game Developers

Because our skills and ideas are not subject to the pressures of outside financers, our projects are self-founded, self-published, and limited only by our imagination.
Frogames lends its cartoonish and colorful touch to the gaming industry in two ways:

1. We provide licensable technical resources that speed up game production so that other developers can savor the freedom of creating world-class games quickly and efficiently.
Discover how our tools and technology can make a difference in your gaming software development cycle by visiting Frogames at www.frogames.net

2. We create and market our cool and innovative video games that are fun to play and, dare we say, slightly addictive. See what we mean by visiting Frogames at www.frogames.com
