Welcome to Music Town!

Thank you for purchasing The Musical World of Professor Piccolo! We hope you enjoy using this interactive, educational overview of many musical topics, especially on the ambitious task of creating an enjoyable course on the basics of music theory.

We hope that The Musical World of Professor Piccolo will serve as a launching point for further study toward a lifetime of enjoyment of this most exciting living language known as music.

                                                —Opcode Interactive

******* IMPORTANT INSTALLATION INFORMATION *******

Installation
You will see two folders on the CD-ROM labeled "Professor Piccolo MIN" and "Professor Piccolo FULL". Drag one of these folders to your hard drive to install
the program depending on the amount of hard disk space you have available.

"Professor Piccolo MIN" copies the minimum amount of
files needed to run the program. You will need to have at least
4MB free hard disk space to run Professor Piccolo this way.

"Professor Piccolo FULL" copies all of the Professor Piccolo
data files from the CD-ROM to your hard drive and requires at least
23MB free hard disk space. Running the program this way offers
the best performance.

Running Professor Piccolo
To run the program, simply open the Professor Piccolo folder on your
hard drive, and double-click on the icon of the Professor Piccolo
application program.
You must have the CD-ROM in the CD-ROM drive to run the program correctly
and hear the CD-Audio sounds.

System Setup Information
You will need to have the following System Extensions installed to run the
program correctly:

                        QuickTime 2.0 (or higher)
                        Apple CD-ROM 5.0 (or higher)
                        Your printer's driver (e.g. Laserwriter,
Imagewriter, etc.)

These extensions come with your system software.  If these extensions are

unavailable to you then re-install your System 7.5 or higher software.
Make sure these extensions are active.

Important!
Check these Control Panels and make sure the following are set correctly:

                     Memory: VIRTUAL MEMORY - OFF

              MODERN MEMORY MANAGER - OFF
                     Monitor: 256 Colors
                     Sound:          Go to "Sound In" and click the
"Options" button.  Make sure that "Internal

              CD" and "Playthrough" are selected.  Go to Volumes and make
sure your

              desired Volume level is set to an audible level.

Gradebook Utility
For teachers and parents, there is a separate application called
"Gradebook".  This utility will allow you to view all of the current users
and what lessons they have completed in the Music School, as well as let
you delete user records.  To use "Gradebook", simply copy the file from the
CD-ROM to your hard drive and double-click on the icon of the application
to run it.

Uninstalling Professor Piccolo
To uninstall the program, simply drag the Professor Piccolo folder and the
ppPrefs file (located in your System Folder) to the trash and empty the
trash.

Troubleshooting
Problem:        No sound is heard.
Try This:       Turn up the volume using the Sound control panel, or from
the volume buttons
                                                            on the
front of your computer.
Problem:        Some sounds play, but others don't.
Try This:       Make sure you have the Apple CD-ROM and QuickTime 2.0
extensions installed
                                                            properly.
You can use the Extensions Manager Control Panel to make sure
                                                    that these
are selected.  Also check the CD-Audio volume level using the
                                                    AppleCD

Audio Player utility application located under the Apple Menu.
Problem:          The sounds don't seem to fit the movie.
Try This:         Make sure the Professor Piccolo CD is in the CD-ROM drive.
Problem:          Printing does not work.
Try This:         Turn on Appletalk using the Chooser.  Make sure your
printer driver shows

                                                up and that
it is selected.  If it does not, try re-installing your printer driver
                                                or system
software. Make sure that the printer is on and that it is
                                                connected
properly.
Problem:          The wrong pictures are displayed in the Instrument Library.
Try This:         Make sure QuickTime 2.0 is installed and active using the
Extensions Manager
                                                Control
Panel.  Also try re-starting your computer.
Problem:          Strange and erratic things are happening.
Try This:         Make sure Virtual Memory and Modern Memory Manager are
turned OFF.  Turn
                                                off all
other extensions besides Apple CD-ROM, QuickTime, and your printer
                                                driver.

Interactive Technical Support line at 415-494-9393, Monday through Friday,
9am-5pm Pacific Standard Time.

Opcode Interactives's Limited 90 Day Warranty
Except to the extent prohibited by law, all implied warranties made by
Opcode Interactive in connection with this manual and software are limited
in duration to ninety (90) days from the date of original purchase, and no
warranties, whether express or implied, shall apply to this product after
said period.
Opcode Interactive makes no warranty or representation, either express or
implied, with respect to the software described in this manual. This
software is sold "as is". The purchaser assumes the entire risk as to its
quality and performance. Under no circumstances shall Opcode Interactive be
liable for any loss or damage, direct, consequential, or incidental,
arising out of the use or inability to use this product.
Some states do not allow limitations on how long an implied warranty lasts
or the exclusion or limitation of incidental or consequential damages, so
the above limitations or exclusions may not apply to you.
