

# PlusOptimizer & PlusMaker CD-ROM

## Installation Instructions

This booklet provides a brief overview of the steps required to use your copy of PlusOptimizer and PlusMaker.

PlusOptimizer can run from the CD or you can drag it on to your hard disk and run it from there. PlusMaker can also run from either the CD or your hard disk, but it cannot be used to convert the disk on which it resides.

Please be sure to read the PlusOptimizer and PlusMaker manuals contained on the CD. These are provided in Adobe Acrobat (PDF) format. If you do not already have a copy of Adobe Acrobat, you can download it from <<http://www.adobe.com>>

This CD contains Mac OS 8.5.1 which can be used to boot any Power Macintosh computer. To do so, insert the PlusOptimizer & PlusMaker CD and restart your Mac. As soon as the monitor turns black, press and hold on to the "C" key on the keyboard. This should allow your Mac to start up from the CD. Keep holding on to the "C" key until you see the message "Welcome to Mac OS". Release the "C" key and launch the desired utility.

## Important PlusMaker Note

Although Mac OS 8.1 is not required to run PlusMaker, you will need Mac OS 8.1 or newer to access the files on a disk once the disk has been converted into Mac OS Extended format. Do not convert the startup hard disk in a Macintosh 68040 or 68LC040 (eg Quadra, Centris or LC630). Do not convert disks that you intend to use with Macs running a version of the System software prior to Mac OS 8.1 as this equipment is unable to read the converted disks.
