

Quick Instruction:

Welcome to Tangram. The objective of this game is to build the shape given on the upper right corner using all seven pieces.

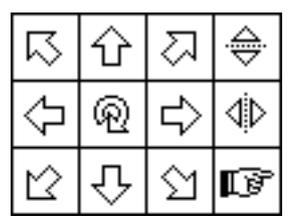

1. Select the hand tool. (Probably it is already selected.)

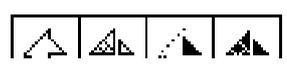

2. Drag the pieces using the mouse. (Press the mouse button while the point is on a piece, move around the mouse with the mouse button down and release the button when the piece is moved to the desired place.) If you drag the center of the piece, it will be translated without rotating and flipping. If you drag the corner of the piece, it will rotate or flip. Refer to the following picture.

3. (optional) If you want to use the buttons on the right to move the pieces, first select a piece by clicking on it then click on the arrow buttons to move around. (You may not need to use these buttons since dragging the pieces with the mouse can do the same thing.)

4. (optional) If you need help, click on one of the help buttons.

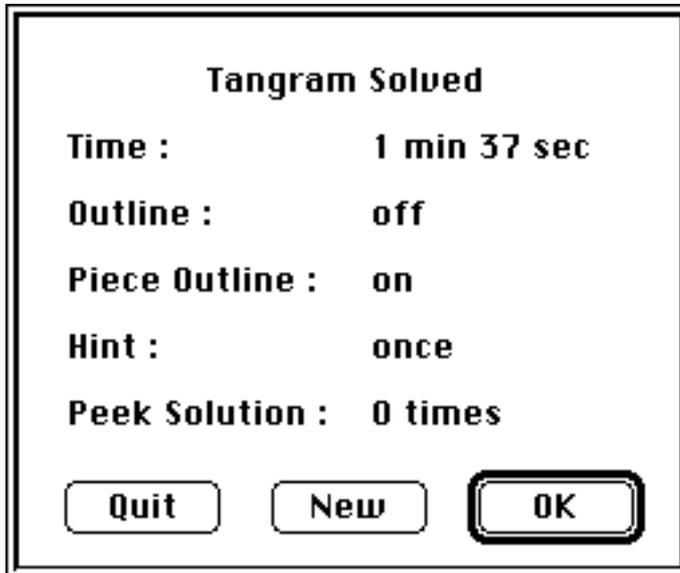

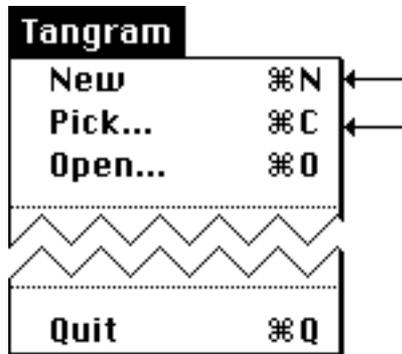

5. When you think you solve the puzzle, click on the check button.

6. If the solution is correct, it will display the following dialog. Otherwise, nothing will happen.

7. Select 'New' or 'Pick...' menu item under 'Tangram' menu for another puzzle.

Please refer to help within the application for more features and detail.

That's it. Quick enough?
