Campfirez Screensaver

May 5, 2006 - Version 1.0
by Michael Briscoe
© 2006, Skyrocket Software

You can almost smell the smoke, feel the heat...

Description:

Bring the relaxing ambience of a crackling fire to your Mac! Campfirez is a realtime fire simulator, complete with authentic sound effects. No need to hunt for firewood, so put away those matches. Start a fire on your screen anytime, without getting burned!

Campfirez employs real-time particle animation to create convincing fire simulations. You can set the shape, color, and location in space. The registered version is fully customizable; allowing control of the spread, speed, size, and decay of up to four separate fire emitters.

So turn off the lights, pull up a camp chair, and crack open a cold one. Just try not to drop roasted marshmallow goo on your keyboard.

FEATURES:

• Realtime Fire and Smoke Simulator.
• Authentic Sound Effects.
• Change the Shape of your Flames.
• Choose the Color of the Fire.
• Set the Fire's Vertical and Depth Location.

ADDITIONAL FEATURES:

You may use Campfirez for **FREE**, but if register for $5.00, you get these additional features:

• Setting Presets.
• Choose the Smoke Color.
• One Fully Editable Smoke Emitter.
• Four Fully Editable Fire Emitters.
• Change Background Color.
• Import Background Picture.
• Control the Intensity of Sound Effects.
• MP3 or AIFF Sound/Music Playback.

Installation Instructions:

MacOS X 10.4 or later:

Double-click the, "Campfirez.saver" file, and follow the directions to install.

To activate the screen saver, go to your System Preferences panel, and select, "Desktop & Screen Saver". Choose the "Campfirez" listing.
