What Is It
Badia PageFrame 1.0 is a free XTension that prints a frame around the page or spread. You can specify the width, color and style of the frame before printing.

To use Badia PageFrame, select "Print Frame Around Page" from the Print dialog **PageFrame** tab and specify its width (in points), color and style. The "Print Frame Around Page" option will remain set for future printing sessions until you switch layouts or projects, quit QuarkXPress or it is manually turned off.

NOTE: PageFrame may not work as expected when combined together with other printing XTensions (such as Badia Printools, Badia Exportools and several imposition XTensions).
