# ///THE ENVIRONMENT

## Your Journal

If you ever need a reminder of what you should be doing, or what your current goal is, press **J** to access your journal. Your journal will display your current goal and help point you in the right direction, if you need a nudge.

## NanoMED Health Units

You can regain health using a NanoMED health unit. To use one, approach it and press **E**. If a NanoMED health unit is empty, you'll need to recharge it with a NanoMED Cartridge.

## Climbing Crates

You can climb crates by approaching them and pressing **E**. Then use the **W** **A** **S** **D** keys to climb up or down the crate.

## Shimmying Along Ledges

You can shimmy along some ledges to new areas. To do this, approach the ledge and press **E**. Then use the **W** **A** **S** **D** keys to move left, right, up or down on the ledge. Press **E** to let go and drop.

## Using Hangrails

Hangrails are pieces of overhead scaffolding that Riddick can move across. Just look up at the hangrail and press **E** to grab it. Then use the **W** **A** **S** **D** keys to move. Press **E** again to let go of the hangrail.

## Restricted Access Doors

If you're having trouble getting through a door with restricted access, try "borrowing" the codes from someone in the area; a guard for example.

### Using Vents

You can use vents to sneak through areas undetected. You need a vent tool to unseal the vents. Once you have one, just approach a vent and press [E].

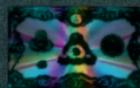

## Interacting With the Environment

There are many inmates and guards in the prison that you can interact with. To do so, approach a character until his/her name appears on screen, and then press [E]. You can get missions from different people that will help you gather items. Take some time to explore and interact. There are hidden surprises for those who get to know their surroundings.

There are also items in the world that you can interact with. To do so, simply approach the item and press [E].

## Useful items that you'll want to collect to help you escape.

### UD Money

The currency of our time, UD Money can be traded for weapons or smokes.

### NanoMED Cartridges

When you need health and a NanoMED health unit is empty, this cartridge will recharge the station and allow you to get health from it.

### Vent Tool

This will help you open sealed vents so you can explore and get deeper into the prison.

### Drugs

There is always demand for this stuff in Butcher Bay; use this to your advantage.

### Smokes

Also a valuable item; smokes unlock special features in the game!

### Bounty Cards

Unlock special features in the game!

## ///USING STEALTH

Heading into a fight with your guns blazing may not always be the best approach. Sometimes a little stealth is more effective, and sometimes it's just more fun to hunt your enemies.

### Stealth Mode

Press **C** to activate stealth mode. Riddick always crouches when in this mode. When you are in stealth mode, you get an indication of when you are hidden in the shadows and undetectable (screen turns to blue). You also move around silently. Being in stealth mode gives you the ability to drag and hide bodies as well.

### Stealth Kills

If you need to keep things quiet, you can sneak up behind an enemy and break his/her neck so as not to alert others. Click the **left mouse button** while closing in on the enemy from behind and you'll perform a stealth kill!

# ///MULTIPLAYER

Select Multiplayer from the Main Menu to play online. You can choose to play through LAN or on Internet. A multiplayer game contains several distinct levels based in Butcher Bay and the Dark Athena.

## Find Game

Select this option to choose a game mode and a map to play, or to let the game decide by selecting Random Game. When the search has been completed you will see a list of servers matching your search criteria.

## Creating a game

Select a game mode from the game mode list or let the game decide by selecting Random Game. Select Create Game to create your server.

# ///WEAPONS

Several weapons you can collect throughout the adventure will help you to make your escape.

## Guns

### Gun

A simple, single-fire weapon. Reliable, but not very powerful.

### SCAR (Single-player)

The SCAR (Sonic Compressor Assault Rifle) is an energy-based weapon which recharges itself automatically. It shoots projectiles that stick to the world and characters. These projectiles can then be detonated using the alternative fire button.

### Sub-Machine Gun

The fire rate of this weapon is higher than the assault rifle but it does less damage. Its automatic fire is also less concentrated.

### Minigun

A high-powered chain gun that spits out 50 rounds per second.

### Shotgun

This weapon is extremely powerful and devastating at close range, but ineffective at a distance.

### Assault Rifle

Good up close or from a distance, this automatic rifle fires rounds rapidly and accurately.

### Tranquilizer Gun

This gun will stun your opponents with a powerful jolt of electricity. But take care of your business quickly—they'll wake up after a while.

### "Modified" SCAR (Multiplayer)

The SCAR used in the multiplayer games is a heavily modified version. It does not recharge automatically and needs ammunition pickups. Projectiles also function differently.

### Grenade Launcher (Multiplayer)

This weapon clears a wide area at some distance.

### Sniper Rifle (Multiplayer – Assault on Dark Athena)

This rifle is effective at very long ranges.

## Melee weapons

### Hairpin

Looks useless? Not in Riddick's hands.

### Ulaks

These double-curved blades are as simple and sharp as they are lethal!

### Shivs

These simple weapons are very effective during hand-to-hand combat.

### **Brass Knuckles or 2 Knuckledusters**

Useful in close fighting; these really pack a punch.

### **Club**

This crude weapon can inflict major damage on your enemies.

### **Grenades**

Grenades are effective at cleaning out rooms, making it safe for you to enter.

## **///ENEMIES**

### **Escape from Butcher Bay**

#### **Inmates**

Prison is a kill-or-be-killed joint. So kill or be killed.

#### **Double-max Light Guard**

Armored guards rush into any fight with a little more confidence than their maximum security counterparts.

#### **Maximum Security Light Guard**

Non-armored guards love to call for backup whenever there's trouble.

### Light Guard Squad Leader

Decorated in red armor, these captains lead their teams in firefights.

### Riot Guard

These heavily armored assault units are mechanized and almost invulnerable.

### Heavy Guard

Not to be toyed with, these guards carry extreme firepower and have orders to kill prisoners on sight, and at will.

### Security Turret

Because guards can't be everywhere at all times, these small camera-turret units survey the prison and neutralize — on the spot — anyone who breaks prison rules.

## Assault on Dark Athena

### The Mercs

Mercs are skilled and organized bounty hunters. But that's not their only form of employment. These guys will do anything for money—and violence is not a major issue. Dark Athena Mercs are even more vicious than those found elsewhere in the universe and they have expanded into enterprises that border on piracy. Riddick will come across different variations of Mercs...

### Ghost Drone

The grotesque inhabitants of the Dark Athena. These once-men warriors are the pride of Captain Revas and her pirate cooperative. Drones wander throughout the ship, constantly on patrol and constantly on alert. Be careful, they're watching...

### AI Ghost Drone

The natural state of the Ghost Drone. While in this mode, the lights attached to their armor glow a bright red, and they operate on their own artificial intelligence.

### Merc-controlled Ghost Drone

The crux of the Ghost Drone army! At any time they can be controlled by Mercs throughout the ship, enhancing their combat abilities and making them twice as deadly. While being controlled, all of the lights attached to their armor glow a blinding white. You'll also hear the Mercs talking to you through the Drones!

### **Team Leader Drone (Merc-controlled)**

Tougher than ordinary Drones and dishes out more damage.

### **Dark Athena Mech**

These heavily armored assault units carry a powerful rocket launcher!

### **Repair Droid**

The automated repair system aboard the Dark Athena dispatches these deadly little machines whenever hull integrity becomes a problem. Be ready. They hurt.

### **Spider Turret**

Built into pods and deployed from the Athena, this turret can attach itself to its designated location. Once locked into position, it will function as a static turret.
