MAC • GENERAL INTEREST

VOLUME 168

DISK ONE

◈ Quagmire
by Tony Small of Cellusoft
The famous Dr. Quagmire has been kidnapped! His safe return is of vital interest to all living creatures on Earth and you are his only hope! You are a Humbot, designed to protect people most essential to national security.

▤ Fleurons
Type 1 Font · The printer's flowers, fleurons, will provide beautiful flowing characters for any document.

sphere

▤ Sphere
Type 1 Font · Add a futuristic look to your documents with this rounded-letter font.

DISK TWO

◈ Backup Reminder by Karl Bunker
Backup your hard disk at timed intervals.

◈ Concentration Program
by James Wright
Test your memory and pattern recognition in this challenging game.

◈ Dater v1.6b1 by Cortex Software
Print a professional-looking calendar on your printer.

◈ Shatterball v0.25
by Christopher Gross
This is a 3-D version of the ancient and venerable brick-smashing game. The goal is to clear the field of bricks (denizens of the evil Rectangular Empire) by shattering them with the repeated hits of a small ball.

◈ Verifile v1.01
by Alessandro Levi Montalcini
Calculate a checksum and a CRC32 on both the data and resource forks of any file you drop on the application icon. This is useful if you want to compare two files that are not on the same machine without having to copy them over a network or modem connection.

◈ HyperDog
by Eric Mattes Software
Have Hyperdog roll over, sit-up, and beg!

DISK THREE

▢ MenuChoice
by Kerry Clendinning
This Control Panel device enables hierarchical menus under the Apple menu. With it you can quickly open applications, control panel devices, and documents of all kinds.

◈ MacNote by Peter H. Jergens
This program acts as a post-it-note system for the computer. No more little sheets of paper all over your desk!

FEATURE PROGRAM

◈ NIH Image v1.51
This image processing and analysis program can acquire, display, edit, enhance, analyze, print and animate images. It will read and write TIFF, PICT, PICS and MacPaint files, providing compatibility with many other applications, including programs for scanning, processing, editing, publishing and analyzing images. Many standard image processing functions are supported, including contrast enhancement, density profiling, smoothing, sharpening, edge detection, median filtering, and spatial convolution with user-defined kernels up to 63x63. This program also incorporates a Pascal-like macro programming language, providing the ability to automate complex, and frequently repetitive, processing tasks.

DISK FOUR

Documents for NIH Image

◉ ARME by Leander Harding
The huge dam over your mountain town has broken, and everything is being washed away! In anticipation of a dam break, your town commissioned six large robotic arms, lettered A through F, and stationed them on towers throughout the town. It is your job to use arm "E" to save the town.

◈ Parrot v1.0b1
by Bernard Bernstein
Parrot listens to the sound input device, remembers everything it hears, and plays everything back in a random order. If your Mac has stereo capability, the program will also randomly choose a speaker to play each sound. The more memory the program has allocated, the more sounds it will remember.

▢ PrintChoice by Kerry Clendinning
This Control Panel device provides a quick way to rechoose a printer without going back into the Apple chooser.

KEY TO SYMBOLS

◈ Application
An application is a program that does not require any other program to run.

◉ HyperCard
The information is arranged like pages in a book (called a stack). Requires HyperCard or HyperCard Run-Time.

▤ Font - Typefaces.
Types to expect are Type 1, Type 3, and TrueType.

▢ INIT/CDEV
INIT (Initialization Resource — also called a startup document): Program that automatically loads into your computer upon each bootup.
CDEV (Control Panel Device): Files in the System Folder located in the Control Panel of the Apple Menu. Each CDEV corresponds to a particular System setting.
