

=====

Argus IG  
SOFTWARE NOVELTY No.5

=====

simMir v1.00

=====

Open the vodka bay door, HAL. Dock your Soyuz capsule with the orbiting Mir space station, while avoiding space junk. Sure to provide endless eons of enjoyment until the giant, earth-crushing meteor arrives.

#### System Requirements:

=====

Macintosh or Macintosh-compatible computer running System 7 or greater. Requires monitor capable of supporting 16 colors, or better. This software is compatible, and has been tested, with both 68K-based Macintoshes and PowerPC Macintoshes

#### How To Play:

=====

How to Play: You are a Russian cosmonaut. Your mission is to dock your Soyuz capsule with the Mir space station.

Move your capsule using the cursor keys.

Avoid the space junk blocking your flightpath to Mir.

When you are approaching Mir please put your tray in its upright and locked position.

#### The Fine Print:

=====

This product "Software Novelty No.5" (also known as "simMir v1.00") is © 1997 by Argus IG; Indianapolis, Indiana, USA, all rights reserved, worldwide. This software product may be distributed freely via any electronic means or storage method as long as this Read Me documentation, and the readme.html, is included, and as long as the application software, the Read Me documentation, and the readme.html are not altered. Put bluntly, this software novelty is merely a shameless effort on our part to promote the Argus IG World Wide Web site, so we encourage you to upload this game to major online services, your local Macintosh BBS, stick a copy on every machine in your office, and

e-mail it to your amigos and relativos all over the globe.  
Sorry, but Argus IG cannot be held responsible for any damage  
resulting from the use of this software. Use at your own risk.
