STAR WARS® TRILOGY CD-ROM

LIMITED EDITION ENTERTAINMENT UTILITY

Sci-fi fans, this is it! The official, Limited Edition CD-ROM collection of multimedia clips from Star Wars, The Empire Strikes Back™ and Return of the Jedi.™ Now you can assign hundreds of audio and video clips of your favorite characters, scenes, and sound effects to system and application events! Be sure to preserve this complete package — it's a genuine, serialized collectible!

MACINTOSH QUICK INSTALL

1. Open the CD-ROM and double-click on the "Star Wars Installer" icon.
2. At the *Star Wars* startup screen, click again.
3. Drag the installer icon on the left to the destination drive icon on the right. This should be the hard drive containing your system folder.
4. If you have already installed some components of this product (Quicktime, for example) you will be given the option to overwrite or skip them.
5. When the installation is completed, restart your Macintosh.
6. Once installed, **SoundMaster** and **VideoBeep** can be accessed from the Control Panels folder, should you desire to modify the preset settings.

• *The VideoBeep settings file — now installed in your system folder — requires your hard disk to be named **Macintosh HD** in order for VideoBeep to find the **Star Wars Video** folder. If your hard disk is named something else, you will have to configure VideoBeep yourself. See the VideoBeep manual in the CD for details.*

NOTE: The Installer program copies onto your hard disk a representative selection of audio and video files, but there are many, many more on the CD. Since video and audio data can take up a lot of disk space, it's best to copy just the files you need onto your hard disk. Preferably, you should copy video files into the **Star Wars Video** folder, and audio files into the **Star Wars Audio** folder (these folders are created on your hard disk by the installer program). From there, they can be easily located and assigned from within the included **SoundMaster** and **VideoBeep** control panels.

WINDOWS QUICK INSTALL

To install Personal Desktop and associated files:

1. From Windows Program Manager, select File, Run and type **D:\SETUP.EXE**. Click OK. **(Note: If your install drive is not your D: drive, substitute the appropriate drive letter)** Setup will prompt you for the installation directory. It will create the directory on your specified hard drive and copy the program and selected data files. It will also create a new program group containing Personal Desktop. It will create a Personal Desktop icon in your StartUp program group, if you have one. If you do not, it will create one. This installation program will also copy audioclips and videoclips files into your hard drive.
2. To avoid conflicts with the standard Windows sound control panel, make sure all events are set to [NONE]. To do this:
 1. Open the Control Panel in the Main program group.
 2. Open the Sound icon (by double clicking it).
 3. Click on each event in the EVENTS column, and set the corresponding FILES setting by scrolling up to [NONE] by clicking it.
 4. When all events have been set to [NONE], click OK, and close the Control Panel.
 5. Proceed to the Video for Windows installation.

INSTALLING VIDEO FOR WINDOWS RUN-TIME SOFTWARE

Before Personal Desktop can play your video files, you will need to have Video for Windows version 1.1 installed, if you do not already.

1. From Program Manager, select File, Run.
 - *(Substitute the appropriate drive letter for your CD-ROM drive.)*
2. In the command line box, type **D:\WINVIDEO\SETUP**
 - *You will need to re-start your computer for Video for Windows to become activated.*
3. The Video For Windows setup program will install and configure the run-time application.

If you have any problems, refer to the manual in the PDESK directory or the on-line help in Personal desktop. *For technical support, call (805) 494-9996 from 9 a.m. to 5 p.m. PST.*
