# VIDEO CASINO

MORE THAN  
**30**  
GAMES IN ALL!

THE ULTIMATE IN DIGITAL GAMING

MACINTOSH CD-ROM

DOLLAR WHEEL • BLACKJACK • BAGGARAT

## 1. WELCOME TO VIDEO CASINO!

Thank you for choosing Video Casino! Now it's time to come claim *your* fortune at this state-of-the-art multimedia gambling hall, complete with Video Poker, Video Slots, Video Blackjack, Video Craps and much more. There are over 30 machines in all!

Explore each of the games in this 3D entertainment complex. Rack up big winnings as you enjoy fast-paced animation and music. And learn new casino games and strategies the easy way. For nonstop gaming action, Video Casino is the only place to be!

## 2. GETTING STARTED

1. Insert the Video Casino CD-ROM and double-click the icon labeled *Check Me Out* prior to running the software.
2. Next, double-click the game designed for your Mac system. (If you are not using a PowerMac, choose either the System 6 or System 7 versions, depending upon your System Software.)
3. Click the New Game button in the lower left corner to pass through the casino doors. You will be taken directly to the Information Booth.
4. You have \$2500 in initial credit to spend as you wish. If you wish to learn more about Video Casino before getting started, insert your credit card into the slot in the upper right corner and select the desired topic.
5. To begin play, click the Exit to Casino button on the right. You'll find yourself on the casino floor where you can begin exploring right away. (Alternatively, you can use the Porter. See Part 3 for details.)

**Note:** For even faster play, copy the Video Casino application to your hard drive.

## 3. NAVIGATING THROUGH THE CASINO

**Choosing a Game:** There are two ways to select a game. You may explore the casino floor or use the Porter to quickly move to a new machine. To use the Porter, exit to the Information Booth or Cashier and see the instructions below; to explore the casino itself, just click the button marked *Exit* or *Exit to Casino*.

**Exploring the Casino Floor:** Use the buttons on the far right panel to move Left, Right, Forward or Backward. Once the machine you wish to play is in view, click the Left or Right button on the middle panel and then Play Select.

**Using the Porter:** From the Information Booth or Cashier, click the Porter Off button in the lower right corner. Then select the desired game using either arrow and click the Port button. (Note that your credit card must be inserted to use the Porter.)

**Starting a Game:** You must insert your credit card in order to play a game. Typically, you will need to wager a bet, as well.

**Getting Help:** Online help, as well as expert tips and tricks are available in each game. Just remove your credit card and click the Info button to learn how to play any game.

**Exiting a Game:** To leave a game, remove your card and click the Exit button.

**Saving a Game:** To save the game currently in play, return to the Information Booth, click the Game Controls button and the Next button. Then click the Save Game button and indicate where you want the data saved. You will be able to return to your game when you run Video Casino next.

**Quitting Video Casino:** To exit from the casino and return to your desktop without saving the game in play, just press Command-Q.

We hope you enjoy playing the wide variety of games at Video Casino!

## 4. TROUBLESHOOTING

These are some of the most commonly asked questions about Video Casino and their respective answers:

**How do I play this game?** Just remove your credit card and click the Info button for Video Casino's online help, complete with game instructions, expert tips and tricks.

**Do I have to wander through the casino to choose a game?** No, use the porter. Just go to the Information Booth or Cashier, insert your credit card, click the Porter in the lower right corner of your screen and use the arrows to select a game.

**Why can't I exit the current game?** Make sure to remove your credit card. You'll then be able to choose the Exit button to return to the casino.

**Can I turn the volume down?** Yes. Return to the Information Booth, insert your credit card, click the Game Controls button and then click the Next button twice to advance to the Volume screen. Then just choose a volume level and click the Done button.
