

About The Authors

Dr. Scott Steinman has served on the faculty of Northeastern Oklahoma State University, the University of Houston, the University of Missouri and the Washington University School of Medicine, where he has taught graduate courses on computer programming in C and Prograph. He is the designer and programmer of the computer-based Infant Visual Diagnostic Laboratory at the Washington University Medical Center. Dr. Steinman's publications include papers on clinical applications of computer programming, fast pixel drawing in 68000 assembly language, C++ programming, and frame animation programming.

Kevin Carver has been an instructor for nine years at the West Kings District High School in Nova Scotia, where he teaches courses in computer programming using Prograph. He has been involved in Prograph programming since 1988, and is the author of "An Introduction to Structured Programming with Prograph".
