

Important Information About the Apple Web Page Construction Kit

Apple Web Page Construction Resources Site Update:

Claris Home Page, which is included with the Apple Web Page Construction Kit, comes with an online tutorial that provides an introduction to using the product. The tutorial is on the Claris Home Page CD in Adobe Acrobat format. You need the Acrobat Reader program installed on your hard disk to use the tutorial.

The Claris Home Page Tutorial is now also included in HTML format on the Web Page Construction Kit Resources Web Site on the Internet at:

<http://ed.info.apple.com/WebKit>

You can view, print, or download this tutorial. If you download the tutorial from the Web Page Construction Resources Site, you can easily use it on your hard disk by opening it in Netscape Navigator or other browser software.

If you do not have Acrobat Reader installed on your computer, you may want to use this version of the tutorial instead of the one on the Claris Home Page CD.

Please check The Web Page Construction Resources Site for regular updates and new resources from Apple, developers, and users of this kit.
