

2012

# WORLD BOOK® Multimedia Encyclopedia

## Minimum System Requirements

### Mac

- **System:** Mac OS X 10.5 or later, including 10.8 "Mountain Lion"
- **Processor:** G4 867 MHz or faster. Includes all Intel Macs.
- **Memory:** 512 MB RAM
- **Display:** 1024x768, Millions of Colors
- **Video Memory:** 8 MB VRAM (16 MB recommended)
- **Free hard disk space:** 1.6 GB
- **DVD-ROM drive**
- **Internet connection:** Required for online features

### Mac Installation

1. Insert the World Book DVD into the drive.
2. Double-click the 2012 World Book Installer icon.
3. Follow the on-screen instructions.

## Technical Support

For information on the latest updates, or if you experience any difficulties using 2012 World Book, visit Software MacKiev's main Technical Support Web site (go to [www.mackiev.com](http://www.mackiev.com) and follow links to Support). Or you may visit the 2012 World Book Technical Support Web site by choosing World Book Tech Support from the Help menu.

## Feedback

We'd love to hear from you with comments, questions or suggestions. Please visit our World Book Feedback page online by choosing Provide World Book Feedback from the World Book application menu (Mac) or from the Help menu (Windows). Or drop us an email at [worldbook@mackiev.com](mailto:worldbook@mackiev.com).

### Windows
