# CAN YOU SAVE THE UNIVERSE?

Having traveled the wide expanse of space, the people of the planet Earth had developed a relationship with many alien civilizations. The Utopian Space Order was born, and prosperity reigned throughout the galaxy. Or so they thought. The evil Cherae Ansebash grew envious and decided to do some colonizing in their own parasitic way. Now you have been placed in command of the USO's ultimate personal strike weapon, the AK-71V3 Lancer. With it you must break through the Cherae's defenses and destroy the Cherae Overlord's Boss Ships. You are the last hope in the survival of our civilization! Good luck, Active Lancer.

- 15 levels of intense vertically scrolling shooter action
- Battle through 5 different environments of the alien homeworld
- Face off against 5 hope-crushing bosses
- Choose from 3 different pilots with their own strengths
- Select from an arsenal of guns and collect rockets and power ups
- Win points to buy upgrades to your Lancer suit
- 2 player simultaneous play over LAN and local game

ACTIVE LANCER

## ACTIVE LANCER

Join Lancer Squad, an elite team of flight capable soldiers, on their current mission to defeat the diabolical war machine of an alien army bent on taking over the universe. Taking the battle to the alien factories over the diverse landscapes of their home world, Active Lancer pits you (and a friend if you have need) against wave after wave of alien ships, tanks, boats, and gun turrets over 15 levels of increasing intensity. It's straight up vertical scrolling arcade shooter action.

## SYSTEM REQUIREMENTS

Mac OS 8.6, 9.X, or 10.X or higher.

333 Mhz G3 or better

64 MB RAM (56 MB Available RAM)

330 MB Hard Drive space

## QUICK START GUIDE

- 1) Insert the CD-ROM into your computer's CD drive. Chances are you've already done this!
- 2) Open the Active Lancer CD that will appear on your desktop. Chances are you've already done this too!
- 3) Drag the Active Lancer folder to your Applications folder and let the entire folder copy.
- 4) Open the Applications folder, open the Active Lancer folder, and double click on the application.

## MAIN MENU

New Game - start a new game.

Practice - start from any chapter you've reached before in a normal game, high scores will not be counted.

Network - start or join a network game (see below).

Help - show you the help screens.  
Hi Scores - show the high scores.  
Options - allows you to customize the controls, graphic options, sound levels, and more.  
Credits - shows you the proud Active Lancer Development Crew  
Demo - shows a demo of the gameplay.  
Quit - quit Active Lancer.

## QUICK START CONTROLS

Arrow keys - move your ship  
Command - fire your air weapon  
Option - fire your ground weapon  
Control - switch weapons  
Shift - Rage (use a Rage Charge if you have one stored up)

Controls can be customized in the Options panel.

For more information about power-ups, the in-game display, and more, click the Help button on the main menu!

## A NOTE ABOUT NETWORK PLAY

While we have attempted to test the network play as much as possible, it is difficult to gauge how every possible network setup will work. As such, the networking functionality in Active Lancer is only recommended for playing over a low latency LAN. If you play over the internet or weak WiFi signal we cannot guarantee that network play will maintain sync.
