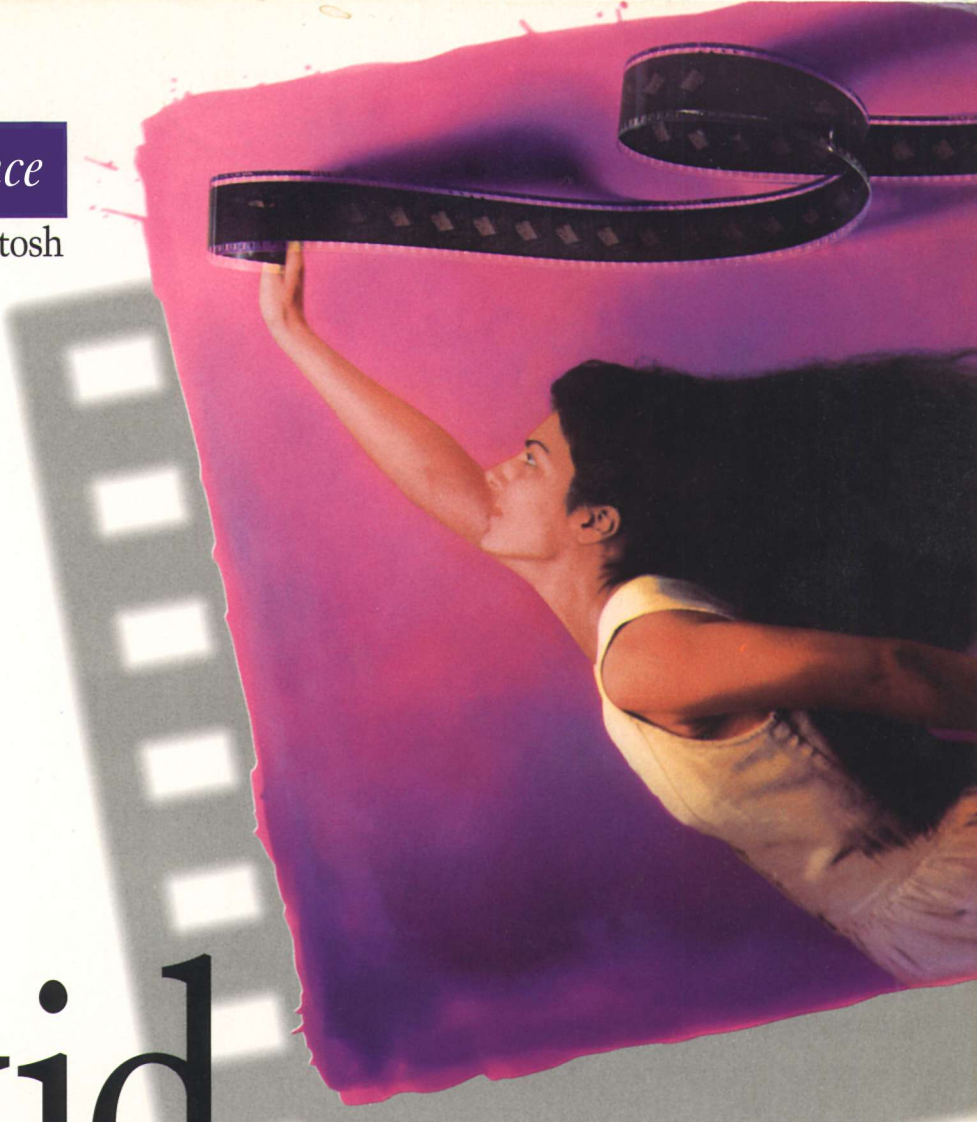
Quick Reference

Version 2.0 Macintosh



Avid VideoShop

The QuickTime™ Movie Editor®

Avid VideoShop 2.0 *Quick Reference*

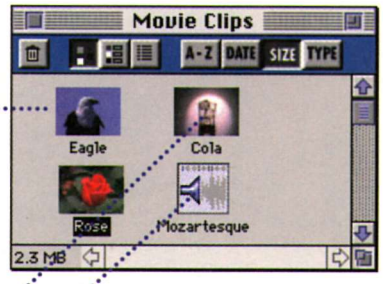
Start Here!

1. *Record video clips, still images, and audio clips using VideoShop's recording tool, then view your clips in VideoShop folders.*

Clip Window

2. *Double click a clip to preview it in a clip window.*

Folder

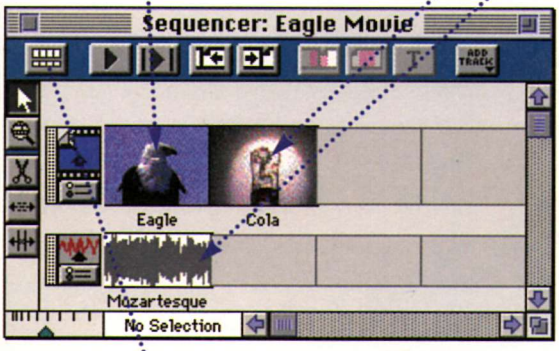


3. *Define IN and OUT points and drag the clip to a video track.*

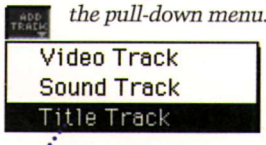
4. *Drag a video clip to a video track.*

5. *Drag an audio clip to an audio track.*

Sequencer
(Storyboard View)

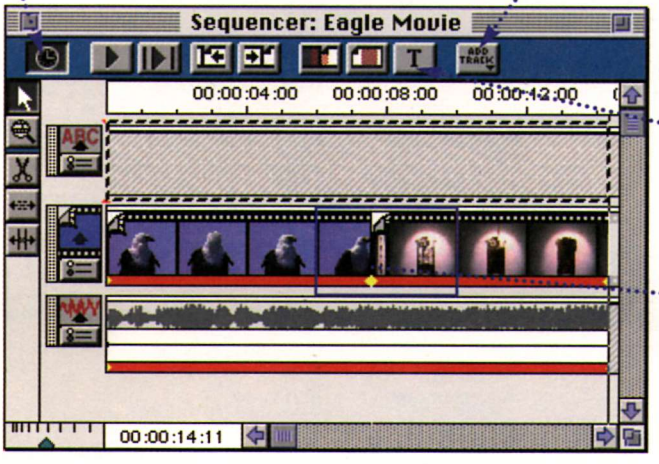


7. *Add a title track by clicking the add track button and choosing Title Track from the pull-down menu.*

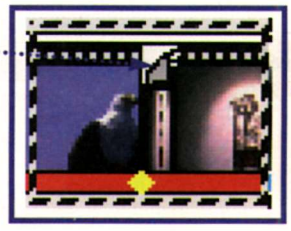


6. *Switch to time view to edit the movie by clicking the storyboard/time view button.*

Sequencer
(Time View)



8. *Select a region on the title track where text should appear, and open a text window by pressing the text window button.*

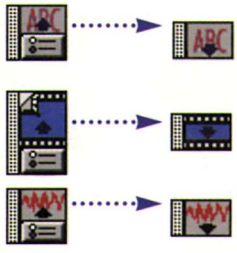


Quick Reference

Canvas Window

Preview the movie in the canvas window by clicking the play button in the canvas window or by pressing the space bar. ⑪

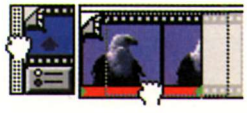
Track Operations



① *Collapse and expand a track by clicking the upper half of the track identifier.*

② *Change track options by clicking the lower half of a track identifier.*

③ *Reposition a track by clicking and dragging the left side of the track identifier.*



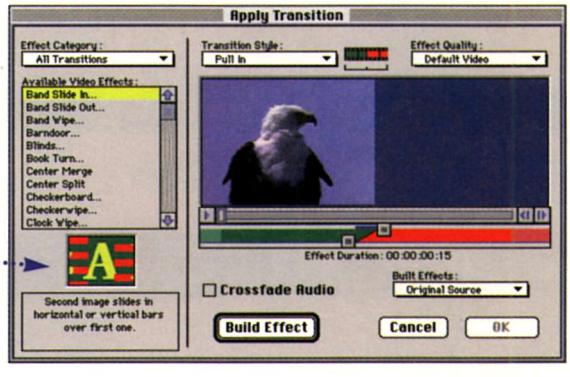
④ *Reposition a clip by clicking and dragging its bottom edge.*

⑤ *Fade audio in and out by selecting the rubber band in an audio track and dragging with the pointed finger tool.*

Title Window

⑨ *Enter text and insert it into the title track by pressing the insert text button.*

Transition Window



⑩ *Apply a transition effect by selecting a region across two video clips, then clicking the transition effect button.*
