

Important notice for running sound and video

In order to run the **Backtracks** CD-ROM, you will need to have the QuickTime software installed on your computer. In addition, if you are running Windows95 on a PC you will need to have the DirectX software installed.

- If you do not already have this software installed, you can install it from the **Backtracks** CD-ROM by following the instructions below.
- If you already have this software installed, you should be able to run **Backtracks**. If you do experience problems, it may be that you are running an older version of QuickTime or DirectX. In this case, simply re-install the software from the CD-ROM by following the instructions below.

PC Users

To install QuickTime, double-click on the 'Qtime' folder which appears when you view the CD-ROM through 'My Computer'. Then double-click on the 'Qteasy32' icon to begin the installation.

To install DirectX, double-click on the 'DirectX' folder, then double-click on the 'SetUp' icon to begin installation.

Mac Users

To install QuickTime, double-click on the 'QuickTime2.5' folder which automatically appears when you load the CD-ROM. Then double-click on the 'DoubleClickMe' icon and follow the on-screen instructions.
