

# CONGO MAC ERRATA SHEET

## System Requirements

Macintosh Quadra, Performa, or PowerMac

68040 Processor or faster

MacOS System 7.5 or higher

8MB of system memory (RAM)

5MB of available memory

Double speed CD-ROM drive

256 Color graphics

Mouse

QuickTime v2.0 or newer

QuickTime-81 Musical Instruments v2.0 or higher

## Installation

To install Congo insert the CD into your CD-ROM drive. Double-click on the CONGO icon on the CD to launch the program. Carefully read the license agreement that appears when you begin installation. If you agree to it, click the YES button and the installation will continue. If you do not agree to it, click the NO button and the installation will end. The Congo program creates a Congo folder within the Preferences folder of your hard disks System folder. Your saved games will be stored in this directory.

## Read Me!

Double-Click on the Readme.txt icon to read the release notes. These notes will help you to optimize your systems and avoid potential problems.

## Getting Started

To play Congo, double-click on the Congo game icon. You must keep the Congo CD in the CD-ROM drive to play. Read the enclosed Survival Guide for interface instructions and game play hints.
