

eXodus™

X Server Software

powerlan
connectivity

eXodus 9.0 is a reliable, feature rich and secure X Server for Apple's Mac® OS.

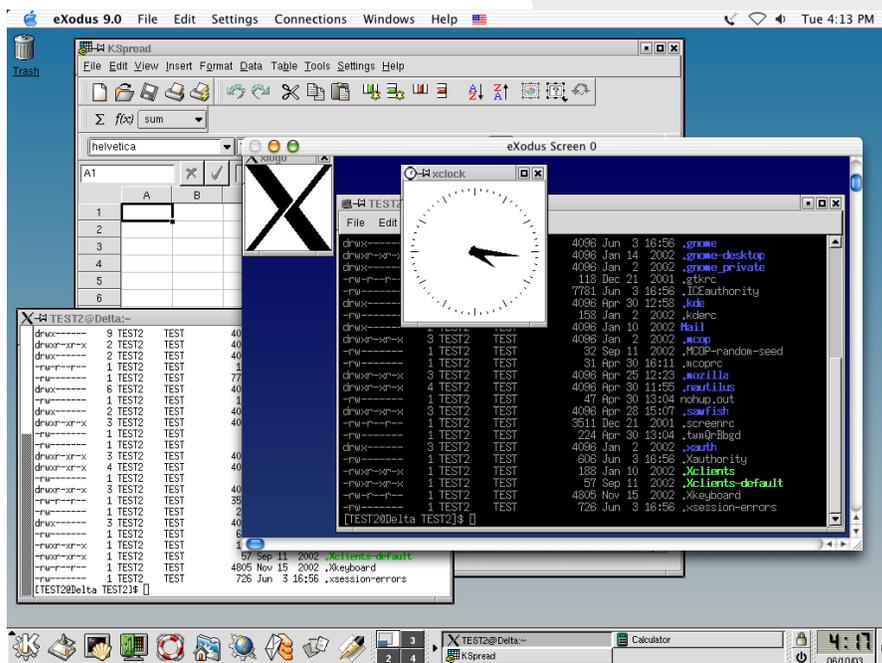

eXodus offers a broad range of enhancements in X Desktop environment support, integrated security services and hardware accelerated 3-D graphics subsystem.

eXodus executes natively on Mac OS X, with its state of the

art Aqua interface, as well as classic MAC OS. eXodus gives you the freedom to upgrade from old to new Mac OS without the problems of incompatibility or re-training users.

eXodus transparently integrates SSH Security via our TunnelMate™ SSH security client, providing the critical safeguards you need to run X applications from anywhere without security concerns. This approach guarantees your X connections are encrypted while sheltering you from the underlying complexities of SSH.

eXodus provides enhanced rootless screen support for X Desktop environments such as KDE, CDE and GNOME. OpenGL® graphic support with hardware acceleration is included as a standard feature for 3-D graphics.

eXodus SSH Session with local host and remote host clients on the latest Mac OS X

eXodus gives you Secure Connections

- Secure Connections with TunnelMate for Mac OS X
- Works great with F-Secure's SSH for Mac OS 9.x
- Xhost, local Xhost, Host Access, and User Access security
- Confirm Connections option for remote connections

eXodus gives you Robust Features

- Fully "Carbon Compliant" for Mac OS X & Classic Mac OS
- Built in OpenGL with Hardware Acceleration
- Easy to use, intuitive X Connection Manager
 - Supports SSH, XDM, REXEC, RSH, & Local connections
- Fully X11R6.4 and ICCM compliant
- True Color Support (16 and 24-bit color)
- Easy text and graphics transfers; full printing capabilities
- X font support, includes 75dpi, 100dpi, and Asian fonts
- Backing Store and Save Under Support
- X Extensions include GLX, XIE, Record, Multi Buffering, Shapes, SYNC, XTEST, DEC Windows® Server Management, and Big Requests
- User-selectable keyboard maps, User-definable X Meta and X Alt keys, and 3-button mouse support

eXodus is Used by

- National Laboratories Nation Wide & World Wide
- NASA, Jet Propulsion Laboratory
- Major Health Research Institutions such as NIH & Genome Research
- Military - US Air Force, US Navy, US Army
- Major Newspapers World Wide
- Colleges and Universities World Wide

POWERLAN

Host system and Network Support

- Supports: CDE, KDE, Gnome, Open Windows®, HP-VUE®, DEC Windows®, & others
- UNIX: Sun, HP, SGI, IBM, COMPAQ, Linux, SCO, others
- OpenVMS Alpha
- TCP/IP Open Transport 1.3 or later

Secure Connectivity

- Integrated SSH security with Powerlan's TunnelMate software for Mac OS X
- Runs transparently - no second terminal application needed!
- Secure encryption of all connections
- Supports SSH protocol versions 1 and 2
- Runs seamlessly with F-Secure's SSH Client for Mac Classic OS 9.x

Integrated OpenGL for eXodus

- Provides support for OpenGL Graphics for all Power PC, G3 & G4 models
- Built in 8, 16, 24 bit GLX X extension for OpenGL 3D rendering

Window Management

- Rootless and traditional rooted screens supported
- Remote window managers: CDE (dtwm), Motif (mwm), Open Windows (olwm), HP-VUE (vuewm), others are supported
- Local "Rootless" Window Management (Mac OS X Aqua, Mac OS, and Motif-styles)

System Requirements

- A PowerPC, iMac, Macintosh G3 or Macintosh G4 computer
- Mac OS 9.0 or later version, including Mac OS X
- Minimum 6MB application RAM available
- 12.5 MB hard disk space available
- TCP/IP network connection
- All color and monochrome monitors and keyboards supported
- CarbonLib 1.2 or later (CarbonLib 1.6 is available as part of the eXodus installation)
- Apple's OpenGL Libraries 1.1.2 or later are required if using the eXodus GLX extension on Mac OS 9.0.x (The OpenGL Installer is available on the eXodus CD)

eXodus Package

- eXodus 9.0
- TunnelMate SSH Client for Mac OS X
- Complete X11R6 compressed fonts package
- FormatR log file conversion application
- Setting files and login scripts for Sun and VMS host computers
- French, German, Swedish, and Swiss/German keymaps
