Overview of Hoyle Slots & Video Poker

Hoyle Slots & Video Poker includes over 350 slot machine variations and 36 Video Poker variations, for hours of virtual gambling entertainment.

Game Descriptions:

Fun Slots

Fun slot machines are variations on the classic fruit slot machines, each with a unique theme. Get three in a row and win!

Video Slots

With all the action happening through computer-generated animation, Video slot machines aren't limited by three spinning reels, only by the imaginations of their creators!

Single Line Slots

Single Line slots have one payline, with the number of coins determining the pay column used. They use the more traditional **bar** and **7** symbols, as well as special, machine-specific symbols.

Multiple Line Slots

Multiple Line slot machines let players bet on additional paylines by adding more coins. Each additional coin activates an additional payline up to the three or five-line maximum, depending on the machine.

Progressive Slots

Progressive slots have an ever-increasing super jackpot tied to a network of multiple machines. The jackpot increases each time someone plays a machine in the network.

Jacks or Better Video Poker

Jacks or Better machines are the Video Poker standard. They require a pair of Jacks or better for a pay out, and there are no wild cards. Expect an even game, with not as many extremes of winning and losing streaks as you get with the Deuces Wild machines.

Deuces Wild Video Poker

With four wild cards, the minimum winning hand is three of a kind in Deuces Wild Video Poker. Expect a roller coaster ride of great winning streaks sandwiched between losing streaks.

10s or Better Video Poker

Some of the earliest Video Poker machines are 10s or Better machines. You can expect the payoffs for a 10s or Better machine to be lower than the Jacks or Better machine. This is natural, since a lower hand (a pair of 10s) brings a win in the 10s or Better machines.

Once you have **signed in**, choose a game by clicking on the kind of game you wish to play. Select a machine and a bet level, and then click **Play** to begin.

To change machines while playing, click the **Go To** button on the menu bar. Move the pointer over the game, machine, and denomination you wish to play. Clicking on the denomination jumps to that machine.

Signing In

When you start Hoyle Slots & Video Poker, you are presented with a dialog box for creating a new player. You must create at least one player, and can create as many as you like for yourself, your friends, and your family members.

Each player has a bankroll, which starts at \$5,000 and changes as you win or lose money. Each player also has a credit card. There are various levels of credit cards available. You start with a green credit card and can advance to higher credit cards by winning money.

To create a new player:

- 1 If there are already other players listed, click the **New** button; otherwise continue to step 2.
- 2 Type your name in the dialog box. Your name will automatically be put on the credit card.
- 3 Click **OK** to create the player.

To sign in a player created during a previous session:

- 1 Find the player in the list of players, using the vertical scroll bar if necessary.
- 2 Click the player's name in the list to highlight it.
- 3 Click **OK** to enter the program as this player.

To delete a player:

- 1 Click on the player's name in the list to highlight it.
- 2 Click the **Delete** button.

Playing Games in Full Screen Mode

You can make Hoyle Slots & Video Poker fill your entire computer screen so that the games are easier to see.

To play in full screen mode:

- ▶ Click the **Options** menu button, then select **Full Screen**. The program resizes to fill the screen.

To return to a windowed mode:

- ▶ Click the **Options** menu button, then select **Window**. The program fits in a window again.

Notes:

- ◆ Maximizing the game window will not make the screen bigger; you must go to full screen mode. This may not work on all computers.
- ◆ Windows users: If you open the online help while in full screen mode, the full screen mode is turned off.
- ◆ You can press ALT+ENTER (Apple key+ENTER on the Macintosh) to quickly switch between viewing the program in full screen or in a window.

Customizing the Game

The Controls dialog box is where you change a number of settings that affect your overall game experience.

Access the Controls dialog box by clicking the **Options** button on the menu bar and selecting **Environment**.

The following settings can be changed using the Controls dialog box:

- ◆ **General:** Choose whether background noise is played, whether sound effects are used, and whether animations play. (If your computer is on the slower side, you may want to turn animations off to speed up game play.)
- ◆ **Speed:** Choose how fast the game play proceeds.

Changing Players

When you start Hoyle Slots & Video Poker, you sign in as a particular player. You have the option of signing in other players so that statistics can be kept for more than one person. When you are playing a particular game, you will not be able to see your character, but you can see who is playing by looking at the name next to the bankroll on the bottom of the screen (to the right of the menu bar).

Changing Players

To change players while at a machine, click the **Go To** button on the menu bar and select **Main Screen**. Then click the **File** button on the menu bar and select **Sign In**. This will return you to the sign in screen, where you can edit the list of players and change the active player. See [Signing In](#) for more details on using the sign in screen.

Viewing Statistics

As you win or lose money in the various games, Hoyle Slots & Video Poker keeps track of how you are doing.

To review long-term statistics:

- 1 Click the **File** button on the menu bar and select **Statistics**.
- 2 Choose a player from the list on the left. The top-right area shows the player's overall statistics.
- 3 You can switch between viewing statistics for Slot Machines and Video Poker by clicking on the drop-down menu under "Game:" in the top-right corner.
- 4 You can reset a player's statistics without resetting their bankroll by clicking the **Clear** button.

About Slot Machines

There are four categories of slot machines in Hoyle Slots & Video Poker: Fun & Video, Single Line, Multiple Line, and Progressive. Each slot machine has its own theme, different credit amounts required for play, and different payouts. See [Choosing a Slot Machine](#) for details on each category and each machine.

Bet Levels

All slot machines in Hoyle Slots & Video Poker are all multi-coin machines. For the Fun & Video and Single Line machines, the number of coins in play determines which pay column is used (pay columns are shown in the lighted panel above the reels). For example, betting two coins activates the second pay column.

The Multiple Line and Progressive machines use multiple paylines instead of successive pay columns. Betting multiple coins activates additional paylines, either horizontally above or below the middle payline, or diagonally.

Slots Odds

The house advantage for the machines is generally about 16 to 20 percent. These odds are not very good compared to the odds for most other casino games. However, you will find that some slot machines are “looser than others, meaning they pay out more money.

Going for a Jackpot

Each reel has at least one jackpot symbol, and to win a jackpot you must get each reel to stop on this jackpot symbol.

For a 20 stop, three-reel machine with one jackpot symbol per reel, the odds of lining up all three jackpot symbols are $20 \times 20 \times 20$, or 8000 to 1. Some machines have more than one jackpot symbol per reel, which improves the odds of hitting a jackpot, but the payout for a jackpot on these machines will usually be lower.

Choosing a Slot Machine

There are four categories of slot machines in Hoyle Slots & Video Poker: Fun & Video, Single Line, Multiple Line, and Progressive. Click on any category to learn more about that kind of slot machine, and click on any name to learn about that machine.

To choose from the available machines while playing Hoyle Slots & Video Poker, click the **Go To** button on the button bar, select Slot Machines, select the category of slot you want to play, pick a machine, and then choose the bet level you want.

At each machine, you must insert a minimum bet. The following bet levels are available:

5¢ 10¢ 25¢ \$1 \$5 \$10 \$25 \$50 \$100 \$250 \$500 \$1000

Fun Slots

Fun slot machines are variations on the classic fruit slot machines, each with a unique theme. They are all single line slot machines that follow the straightforward fruit model: there is one cherry-style symbol that pays a small payout when one or two show up, and there is one lemon-style symbol that is worth nothing, even with three in a row. For all other symbols, get three in a row and win!

[\[back\]](#)

Single Line Slots

Single Line slots, like Fun slots, have one payline, with the number of coins determining the pay column used. Unlike Fun slots, they use the more traditional **bar** and **7** symbols, as well as special, machine-specific symbols. Click on the name of any single line slot to learn more about it.

[\[back\]](#)

Multiple Line Slots

Multiple Line slot machines let players bet on additional paylines by adding more coins. Each additional coin activates an additional payline up to the 3 or 5 line maximum, depending on the machine. Multiple Line slots use the traditional **bar** and **7** symbols, as well as special, machine-specific symbols. Click on the name of any Multiple Line slot to learn more about it.

[\[back\]](#)

Progressive Slots

Progressive slots are similar to their Multiple Line counterparts. Progressive slots, however, have an ever-increasing super jackpot tied to a network of multiple machines. The jackpot progressively increases each time someone plays a machine in the network. When a player eventually hits the progressive jackpot, it resets to a base starting point and begins building again. Click on the name of any Progressive slot to learn more about it.

[\[back\]](#)

Video Slots

Video slots are relative newcomers to casinos. Instead of the usual reels and gears, Video slots use a video screen and a computer. With all the action happening through computer-generated animation, Video slots aren't limited by three spinning reels, only by the imaginations of their creators. Click on the name of a Video slot machine to learn more about it.

The image shows the paytable for the slot machine "Flying High". The title "Flying High" is at the top, with "Flying" in a cursive font and "High" in a bold, blocky font. Below the title, there are illustrations of a blimp, a hot air balloon, and a small airplane. The paytable is a grid with 7 rows and 3 columns. The columns are labeled "1 Coin", "2 Coin", and "3 Coin". The rows represent different symbols: a large airplane, a small airplane, a helicopter, a propeller plane, a blimp, a propeller, and a propeller with the word "ANY" below it. The pay values are listed in the center of the grid.

Playing Slot Machines

To play a slot machine:

- 1 Click on the bill slot on the front of the machine. You will be asked to enter how many credits you want to put into the machine. Click **OK** when done.
- 2 Bet the amount you want for the current spin by clicking **Bet One**, **Bet Max**, or **Play Max**.
- 3 Spin the reels by clicking the arm, clicking the Spin button, pressing **S** on the keyboard, or choosing **Spin** from the Actions menu.

If you win, you accumulate credits. You can then bet your credits (instead of inserting more coins) for the next spin. You can bet from one coin up to the maximum number of coins available by clicking the **Bet One** or **Bet Max** buttons.

To collect your credits, click **Cash Out**. Your bankroll will be automatically credited.

Summary of Slot Machine Buttons

Bet One

Bets one coin from your credits to play a single row. On a multi-coin machine, use this option to specify the exact number of coin plays you want, without making a maximum coin bet. You can only use this option if you have credits on the machine.

You can bet one coin from your credits during play by:

- ✦ Clicking **Bet One** (when it is lit).
- ✦ Pressing the letter **B** on the keyboard.
- ✦ Choosing **Bet One** from the Actions menu.

Bet Max

Bets the maximum number of coins from your credits to play all available rows (and bets) on a multi-coin machine. You can only use this option if you have enough money in your bankroll to cover the maximum bet amount.

You can make a maximum coin bet during play by:

- ✦ Clicking **Bet Max** (when it is lit).
- ✦ Pressing the letter **M** on the keyboard.
- ✦ Choosing **Bet Max** from the Actions menu.

Play Max

Bets the maximum number of coins from your credits to play all available rows (and bets) on a multi-coin machine and automatically starts the spin for play. You can only use this option if you have enough credits on the machine.

You can play the maximum bet by:

- ✦ Clicking **Play Max** (when it is lit).
- ✦ Pressing the letter **P** on the keyboard.
- ✦ Choosing **Play Max** from the Actions menu.

Spin

Spins the reels to play.

You can spin by:

- ✦ Clicking the arm on the slot machine.
- ✦ Clicking **Spin** (when it is lit).
- ✦ Pressing the letter **S** on the keyboard.
- ✦ Choosing **Spin** from the Actions menu.

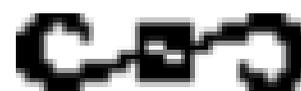

Cash Out

Pays out all credits and coins bet in the machine. When you cash out, the coins fall out the bottom of the machine or are immediately credited to your bankroll.

You can cash out by:

- ✦ Clicking **Cash Out** (when it is lit).

- ✦ Pressing the letter **C** on the keyboard.
- ✦ Choosing **Cash Out** from the *Actions* menu.

About Video Poker

One of the most recent additions to the casino environment is Video Poker, a man-against-machine electronic version of the traditional favorite, Poker. A new generation of gamblers is comfortable with the technology of electronic or computerized games, and enjoys this form of entertainment.

Some people enjoy the solitude that Video Poker provides. It can be easier to concentrate on winning without distractions that inevitably occur where a human dealer and other human players are involved. In Video Poker, you don't have to think about bluffing, betting, and whether you're giving out too much information; you just think about the cards, and play. You also don't have to wait for shuffling and dealing. The machine makes these things happen instantaneously. Many compulsive Video Poker enthusiasts are blazingly fast players, but this is a matter of choice. You can set your own pace in this game.

The alternative explanation for the game's great popularity is that some Video Poker machines offer an opportunity to win money from the casino. A few machines pay out a 102 percent return on your money if you adhere to an optimal strategy. Now those are worthwhile odds!

Choosing a Video Poker Machine

There are three types of Video Poker machines: Jacks or Better, Deuces Wild, and 10s or Better. To learn more about the types of machines or any individual machine, click on the names below.

When you join a Video Poker game, you must choose the game based on the bet level. You must observe the minimum bet amounts during play.

To choose from the available machines while playing Hoyle Slots & Video Poker, click the **Go To** menu, select Video Poker, pick a machine, and then choose the bet level.

The machines have different payoff percentages. Advertised payoff percentages are purposefully misleading, though. When a casino says they have a machine with a 99% payoff percentage, it doesn't mean the machine produces a win 99% of the time. It means that in the long run, the odds are you will win back 99% of the money you wager. Click on the name of any machine to see its payoff percentage.

At each machine, you must insert a minimum bet. The following bet levels are available:

\$1 \$5 \$25 \$100

Jacks or Better Machines

The Jacks or Better machines pay out 98 percent to 100 percent at the top end. Expect an even game when playing the Jacks or Better machines, with not as many extremes of winning and losing streaks as you get with the Deuces Wild machines.

[\[back\]](#)

Deuces Wild Machines

Some Deuces Wild machines offer great potential for winning money, with a few offering returns up to 102 percent. Naturally, with four wild cards the minimum winning hand is going to change; expect Deuces Wild machines to display three of a kind as a minimum hand. Expect a roller coaster ride of great winning streaks sandwiched between losing streaks.

When playing Deuces Wild machines, make sure you never discard your 2s; it's easy to forget how valuable they are!

[\[back\]](#)

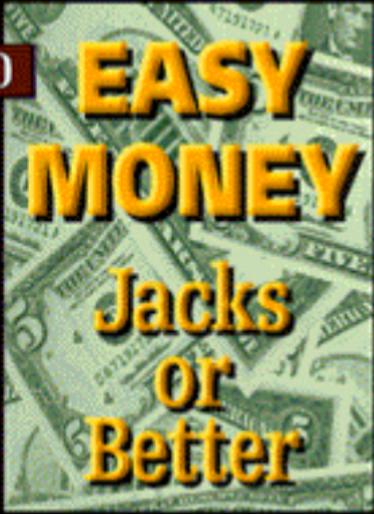

10s or Better Machines

Some of the earliest Video Poker machines are 10s or Better machines. It's usually difficult to find a 10s or Better machine that offers a high return, although it's possible to find some wheat among the chaff. A few machines may offer close to a 100 percent return, but most are in the 90-95 percent range.

You can expect the payoffs for a 10s or Better machine to be lower than the Jacks or Better machine. This is natural, since a lower hand (a pair of 10s) brings a win in the 10s or Better machines.

Easy Money

Payoff: 100%.

This machine is called a 9/6 Jacks or Better machine. The 9/6 refers to the payoff for the full house (9 to 1) and the flush (6 to 1). 9/6 Jacks or Better machines with a high five-coin royal flush payout are among the better Video Poker machines you will find, and will pay even money if you adhere to an optimal playing strategy.

Wild Country

Payoff: below 94%.

Wild Country is the only Deuces Wild machine to pay 4-1 on full houses, but it pays lower on straight flushes, five of a kind, and wild royal flushes. In the short run, the 4-1 full house is nice, but when you finally hit that five of a kind, you'll wish you were on a different machine.

Born 2 Be Wild

Payoff: below 95%.

Born 2 Be Wild offers lower payouts than Wild Thing on straight flushes or better, and it doesn't offer higher payouts on the lower hands to compensate. Accordingly, the payoff percentage on Born 2 Be Wild is lower than it is on Wild Thing.

Below the title, there are two pitchforks crossed, and at the bottom, there are flames. The background of the graphic has a halftone dot pattern.

Wild Thing

Payoff: below 96%.

The higher payouts for straight flushes or better make this a relatively good Deuces Wild machine.

Wild Party

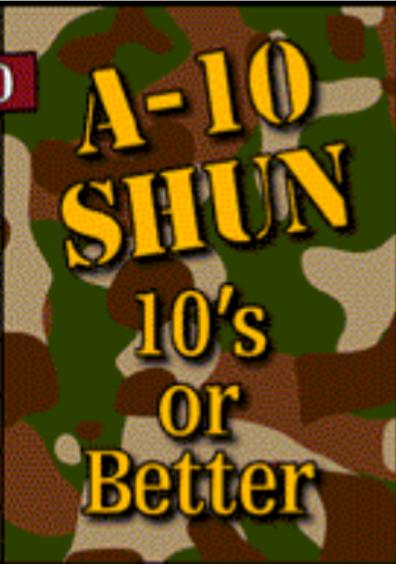

Payoff: 99%.

In addition to the four deuces, a wild joker is also included with Wild Party. There is a nice 3-1 payoff on flushes, and the 800-1 payout on a natural royal flush is better than any of the other machines. There is a much lower payout on four of a kind through four deuces, but the additional wild card means you will hit payoffs more often. The extra straights and flushes will make up for the lower jackpots on the high hands.

Wild Party also has a 4000-1 payoff for 5 wild cards!

Playing Video Poker

To play a Video Poker machine, click the bill slot on the machine, and choose how many credits you want to play with. The payoff scale for the machine is shown in the lighted panel above the buttons, and tells you how many coins (credits) you receive for all possible winning hands. Typically, the winning hands in Video Poker are the same type of hands you will find in a traditional Poker game, such as a straight flush or four of a kind.

You can bet anywhere from one to five credits at a time. You have two options in betting:

- ✦ Click the **Bet One** button once for each credit you wish to bet.
- ✦ Click the **Bet Max** button to bet five credits.

When you bet five credits, the machine automatically deals you five cards. When you bet less than five credits, you must click the **Deal** button to receive your first five cards.

Five cards appear on the screen after you click the **Deal** button. At this point you must choose the cards you want to keep. You are allowed one re-deal, and can draw anywhere from zero to five new cards. Each card must be individually selected if you wish to keep it. You can keep a card by clicking it, at which point the word **Held** shows up on the screen above the card. Cards marked by the word **Held** will not be replaced when you draw new cards. You can easily change your mind about keeping a card by clicking it a second time. Make sure the **Held** notation disappears when you do so.

If you have a pat hand (five good cards), you can click the **Hold All** button to quickly mark each card with **Hold**. Conversely, the **Discard All** button unmarks each card.

When you're ready to draw new cards, click the **Deal** button. The cards not marked by the word **Held** will be replaced, resulting in your final hand.

If you win, you then accumulate credits. To collect your credit(s), click the **Cash Out** button.
