

## Live Owners Manual Addendum

### 1. ASIO Driver Placement (Macintosh only)

To make ASIO available to Live, please copy the ASIO drivers for your audio interfaces to the ASIO folder which is contained in the Live folder.

### 2. Known VST Plug-In Problems

Please make sure Live's VST Plug-Ins folder does not contain VST 2 instrument plug-ins. You cannot use VST instruments in Live, and their presence may create problems, particularly on the Macintosh.

On the Macintosh, the following VST Plug-Ins are known not to work with Live:

- Live will not launch if Prosonic's Orange Vocoder is in the VST Plug-In folder.
- TC | Native Effects will not work properly if a low-level debugger is running on your Macintosh.

We are working on fixes for these problems. Please report any VST-related problems you may encounter to [bugs@ableton.com](mailto:bugs@ableton.com).

### 3. Table of Live Keyboard Shortcuts

Function	Key	Command / Control	Shift	Alt / Option
----------	-----	-------------------	-------	--------------

#### 3.1. Menu Shortcuts

##### File Menu

Close	W	Command / Control		
New Live Set	N	Command / Control		
Open Live Set...	O	Command / Control		
Save Live Set	S	Command / Control		
Save Live Set As...	S	Command / Control	Shift	

Edit Menu

Undo	Z	Command / Control		
Redo	Y	Command / Control		
Cut	X	Command / Control		
Cut Time / Scenes	X	Command / Control	Shift	
Cut Envelope	X	Command / Control		Alt / Option
Copy	C	Command / Control		
Copy Envelope	C	Command / Control		Alt / Option
Paste	V	Command / Control		
Paste Time / Scenes	V	Command / Control	Shift	
Duplicate	D	Command / Control		
Duplicate Time / Scenes	D	Command / Control	Shift	
Duplicate Envelope	D	Command / Control		Alt / Option
Dolote	Del / Backspace			
Delete Time	Del / Backspace	Command / Control	Shift	
Delete Scenes	Del / Backspace	Command / Control	Shift
