

ROBINSON'S REQUIEM CD-ROM

ENTRY MENU

Two additional options are offered:

Video Mode: This option is represented by a camera. Video sequences appear during the game when you encounter characters who wish to speak to you. If you do not wish to view these sequences, cancel the "Camera" icon. The characters will remain in the picture in 3D and their text will be displayed at the bottom of the screen.

Arcade Mode: Symbolized by a machine gun, this mode requires a large number of battles to be fought. You will benefit from several arms and have to confront many more enemies, however, the scenario will remain the same. By default this mode is not selected.

LEVEL OF DIFFICULTY

In the beginner's mode, if you decide to move where there is a large drop in levels, you will not fall; instead you will be stopped just in time. Be very careful as you can still fall from the bridges. In the Confirmed or Professional Mode, the program does not intervene in your movements and there is a chance of breaking a limb, or worse still, losing your life.
